man who often panhandled near her office They chatted effortlessly as they ate there were no half truths or white lies and no fear of judgment Helena felt connected and unburdened in a way she hadn't in years Inspired she posted an ad on Craigslist promising to listen anonymously and for free to whatever the speaker felt he or she couldn't tell anyone else Emails from people desperate to connect flooded her inbox and she listened Within months Helena quit her job deferred her loans and dove into listening full time The forty first person confessions in this book are vivid intimate and real they range from devastating traumas to lost loves to reflections on hard choices Some accounts are quotidian like that of one increasingly estranged husband I want to feel that we're not just roommates that we're not just waiting for the kids to grow up so that we can move on Others are deeply disconcerting like that of a sex addict employed by a religious organization and several are heartening like that of a mother who dares to hope that her daughter born with life threatening heart defects will one day walk down the aisle Sometimes you need to have the audacity to believe that it will all be okay that it is okay to have the same kinds of dreams as everyone else In its complex portrayal of the common human experience Craigslist Confessional challenges us to explore the depths of our vulnerability and expand the borders of our empathy

The Starfish and the Spider Ori Brafman, Rod A. Beckstrom, 2006-10-05 If you cut off a spider's leg it's crippled if you cut off its head it dies But if you cut off a starfish's leg it grows a new one and the old leg can grow into an entirely new starfish What's the hidden power behind the success of Wikipedia Craigslist and Skype What do eBay and General Electric have in common with the abolitionist and women's rights movements What fundamental choice put General Motors and Toyota on vastly different paths How could winning a Supreme Court case be the biggest mistake MGM could have made After five years of groundbreaking research Ori Brafman and Rod Beckstrom share some unexpected answers gripping stories and a tapestry of unlikely connections The Starfish and the Spider argues that organizations fall into two categories traditional spiders which have a rigid hierarchy and top down leadership and revolutionary starfish which rely on the power of peer relationships The Starfish and the Spider explores what happens when starfish take on spiders such as the music industry vs Napster Kazaa and the P2P services that followed It reveals how established companies and institutions from IBM to Intuit to the US government are also learning how to incorporate starfish principles to achieve success The book explores How the Apaches fended off the powerful Spanish army for 200 years The power of a simple circle The importance of catalysts who have an uncanny ability to bring people together How the Internet has become a breeding ground for leaderless organizations How Alcoholics Anonymous has reached untold millions with only a shared ideology and without a leader The Starfish and the Spider is the rare book that will change how you understand the world around you

Pandemics and Resilience: Lessons we should have learned from Zika David M. Berube, 2023-05-05 The aim of the book was to produce the most comprehensive examination of a pandemic that has ever been attempted By cataloging the full extent of the Zika pandemic this book will be the most complete history and epistemic contextualization ever attempted to date The work should function

as the primary source for students researchers and scholars who need information about the Zika pandemic This book examines the technical literature digital and popular literature and online materials to fully contextualize this event and provide a bona fide record of this event and its implications for the future It is somewhat serendipitous that while this work was underway we are going through another pandemic One of the primary lessons we did not learn by Zika was pandemic events will return repeatedly and we need to learn from each one of them to prepare the planet for the next one Just because Zika seemed to have died out does not make it less important We were lucky that the virus evolved into what seemed to be a less virulent version of itself and the vector mosquitoes were concentrated elsewhere Finally this book represents a tour de force in scholarship involving nearly 4 000 sources of information and does not shy from a detailed examination of the controversies conspiracies and long term consequences when we avoid learning from outbreaks such as Zika

New Economy, New Rules , **The Invented State** Emily A. Thorson, 2024 In *The Invented State* Emily Thorson argues that a problematic and understudied aspect of political misinformation reflects widespread public misperception about what the government does Because much of public policy is invisible to the public there is fertile ground for false beliefs to flourish leading to the creation of what Thorson terms the invented state systematic misperceptions about public policy However people get the facts wrong not because they are lazy stupid or blinded by partisan loyalty Rather misperceptions are created when three conditions are met when citizens have incomplete information about an issue when their own biases color their understanding of it and when they feel that the issue is important In other words the invented state is created not just by exposure to explicit misinformation but also by individuals cognitive errors Correcting these policy misperceptions is highly effective at reducing false beliefs In addition providing people with corrective information has downstream effects on attitudes When they learn how policies including Social Security refugee policy and the Temporary Assistance for Needy Families program really work their approval of these policies increases and they also shift their policy priorities Contrary to pundits assumptions of a public who is largely indifferent to policy there is a deep public desire to learn basic facts about how the government works Thorson meets that desire with analysis on how the news media can identify and effectively correct substantive policy misperceptions *The Invented State* not only sheds a new light on how Americans think about policy but can also help to inform evidence based interventions to improve democratic competence

Chasing Water Anthony Ervin, Constantine Markides, 2016-03-14 *The Olympic swimmer reveals the wild and challenging journey that took place between two gold medals Inspiring humorous and often profound People Magazine* Anthony Ervin is an Olympic swimmer who won the gold at nineteen and that may be one of the least interesting things about him An athlete of Jewish and African American descent who is also a practicing Buddhist he auctioned off the medal he won in Sydney to help raise funds for victims of the 2004 tsunami He had grown up battling Tourette s syndrome and later struggled with suicidal depression drinking and drugs and a period of homelessness This blend of memoir and biography written by Ervin in collaboration with

trainer Constantine Markides is part spiritual quest part self destructive bender involving Zen temples fast motorcycles tattoo parlors and rock n roll bands revealing the journey that preceded his remarkable 2016 Olympic comeback as the oldest individual gold medal winner in swimming Winner of the 2018 Buck Dawson Author Award presented by the International Swimming Hall of Fame Gripping Readers will understand the psyche and life of elite athletes as never before Library Journal A celebrated Olympian recounts how he rose to the top of his sport crashed and found redemption The author never flinches at revealing his less than perfect past and the humility he demonstrates at coming to terms with his own egotism and personal shortcomings makes the book frequently compelling A provocative and refreshingly honest redemption memoir Kirkus Reviews **Miami e le Keys.
