Ben-Shaul, 2006 Images are the core of television news particularly in the coverage of terror events and war where pictures often overwhelm the verbal commentary A Violent World analyzes images on three channels global CNN Israeli IBA and Palestinian PATV that contribute heavily to how the current violence in the Middle East is framed Nitzan Ben Shaul uses critical media theory and qualitative and aesthetic approaches drawn from cinema studies to examine how dominant ideologies are embedded in mainstream TV news Specifically he focuses on the American elites global ideology and the conflicting dominant national peripheral ideologies of Israeli Palestinian elites His in depth study of particular interest to scholars of Middle East studies and international communication offers a new model of analysis for contemporary television news Book jacket

Encyclopedia of Cryptozoology Michael Newton, 2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology Here 2 744 entries are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology *Media Spectacle and Insurrection, 2011* Douglas Kellner, 2012-11-02 Douglas Kellner elaborates upon his well known theory which explores how media spectacle can be used as a key to interpreting contemporary culture and politics Grounded in both cultural and communication theory Kellner argues that politics war news and information media events like terrorist attacks or royal weddings and now democratic uprisings are currently organized around media spectacles and demonstrates how and why this has occurred Rooting the discussions within key events of 2011 including the war in Libya the Arab Uprisings the wedding of William Windsor to Kate Middleton the killing of Osama bin Laden and the Occupy movements Media Spectacle and Insurrection 2011 makes a highly relevant contribution to the field of media and communication studies It offers a fresh perspective on the theme of contemporary media spectacle and politics by adopting an approach that is based around critical

social and cultural theory This series gives students a strong critical grounding from which to examine new media
