Routledge Handbook on Business and Management in the Middle East Yusuf Sidani, 2024-07-31 This Handbook provides thorough insights into crucial topics that have attracted scholarly and practitioner interest in business and management in the Middle Eastern region. The chapters of this Handbook open the window on the key areas of discussion in the field over the past few decades, including organizational behavior, leadership, business culture, business ethics, human resources, business strategy, entrepreneurship, finance, and accounting. It starts with identifying five key themes emerging from the variety of topics, locations, and questions addressed by the various authors who contributed to this volume. The remaining 30 chapters tackle various topics of interest to the research and the practitioner: institutional contexts for doing business in the region; issues of leadership, ethics, and organizational behavior; the role of women in leadership and some of the obstacles facing aspirant women leaders; people management and human resources issues in the Middle East; marketing in the Middle East; and strategy and entrepreneurship in the Middle East. The book closes with a reflection on management research in non-Western societies and describes some methodological challenges and propositions. The Handbook is designed for academics, students, and practitioners, covering areas of relevance across business activities, functions, and locations in the Middle East. It is to be used as a reference for scholars doing business research or teaching and for practitioners involved in business activities in the region. **The Socio-Economic Approach to Management Revisited**

Socio Economic Institute for Firms and Organizations ISEOR a French intervention research think tank co directed by Henri Savall and Vronique Zardet Building on an earlier collaboration on the ISEOR approach Socio Economic Intervention in Organizations The Intervener Researcher and the SEAM Approach to Organizational Analysis IAP 2007 Buono and Savall bring together over 30 talented intervener researchers to explore and examine the ongoing evolution of the Socio Economic Approach to Management SEAM This volume revisits the application of SEAM in the context of intervention challenges in the wake of the recent economic crisis and the disruptive change that has taken hold across the world The basic foundation of SEAM built on the idea of strategic patience the need to undertake holistic intervention in organizations and the challenge to get organizational members to listen to themselves through what they refer to as the mirror effect has remained the same In response to economic and organizational pressures in the current environment however there has been a concomitant emphasis on helping client organizations achieve short term results while still maintaining focus on the long term Many ideas that have become part of the current discourse within ISEOR today were not as explicitly addressed in the initial volume from the destructive effect of the Taylorism Fayolism Weberism TFW virus to the need to focus on ways to ensure the sustainability of a SEAM intervention the growing importance of collaborative interactions between external and internal consultants and the growing importance of cocreating knowledge with client firms and organizations
