

Stern Drive Shift System

The stern drive Shift System starts here . . . at the remote control lever . . .

. . . and ends here . . . at the propeller.

What's Most Important?

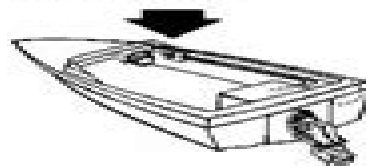

When control lever is in Forward, Neutral or Reverse "position"

Shift linkage must match control lever "position"

What Could Happen?

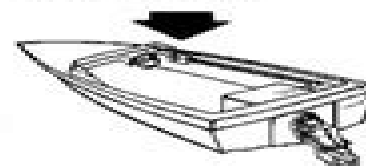

- If . . . Neutral

Forward or Reverse

. . . propeller is still powered (turning) unknown to operator, or engine will start in gear, boat will move suddenly.

- If . . . Forward

Reverse

. . . boat will move opposite to direction wanted by operator.

How Can Loss of Shift Control be Minimized?

In pre-delivery inspection and when servicing

- Read, understand, and follow manufacturers instructions.
- Closely follow the warnings marked with this symbol,  . . .
- Assemble parts carefully . . .
- Make adjustments carefully . . .
- Test your work. Don't guess. Make sure propeller does just what the operator wants and nothing else.
- Do not shift gears when engine is stopped. Adjustments can be lost and parts weakened.

Cobra Sterndrive Repair Manual
