Book Description

This text uses practical applications and an accessible writing style to present a summary of psychological research on students' learning of academic subject areas. The text is organized into three main sections. 1. General principles of learning, memory, intelligence, problem-solving, and motivation that apply to any school-related skill. Unlike typical books on cognitive development, these general principles are explicitly translated to classroom practice. 2. Specific developmental trends in the acquisition of skills in the areas of reading, writing, mathematics, science, and social studies. The reader will learn what children can understand and do at various ages in these domains. 3. Understanding gender and ethnic differences in achievement.

Language and Literacy Development James P. Byrnes, Barbara A. Wasik, 2019-08-05 This established text now revised and

updated reveals how spoken language skills are acquired and how they affect children's later reading and writing achievement. With a unique focus on the needs of educators, the book examines the foundations of language in the developing brain. It explores the relationship of language processes to core literacy skills and probes the impact of motivational and sociocultural factors on children's learning. Implications of developmental knowledge for classroom instruction are highlighted and effective practices reviewed. Revealing vignettes, clear explanations of research, and lists of main ideas enhance the text's accessibility for preservice teachers.

New to This Edition: Chapter on emergent literacy and the predictors of reading success. Incorporates the latest research, including findings from key longitudinal studies. Increased attention to English learners, low-income children, and children with disabilities. Updated and expanded topics, including usage-based theories of language acquisition, morphological knowledge in vocabulary and comprehension, phonological processing skills, and writing development.

UTAGS Administration Manual M. Steve McCallum, Bruce Bracken, 2023-05-31 This is the technical manual for the Universal Talented and Gifted Screener. Universal Talented and Gifted Screener (UTAGS) features up-to-date national norms, is effective with twice exceptional learners, includes bias-free items, and provides a fair assessment regardless of student demographic characteristics. The UTAGS offers schools a time-saving screener for identifying gifted and advanced learners. Designed to be culturally and linguistically fair, the UTAGS is ideal for schools seeking a nationally normed, statistically sound identification screener. Additionally, the UTAGS includes specific considerations for identifying twice exceptional learners. UTAGS is designed to screen potentially gifted students in six important areas of school success: cognition, creativity, leadership, literacy, math, and science. This theoretically sound instrument provides easily interpretable scores in the IQ metric (i.e., Mean 100, SD 15) and identifies student strengths/weaknesses in a quick, accurate, and cost-efficient format. UTAGS provides interpretation norms based on a standardization sample of 2,492 participants from 22 states; student demographics closely reflect the United States population. The authors also provide a guide for local norming. Assessment fairness was a strong consideration during the UTAGS development, and teacher raters are requested to focus on effective examinee communication strategies rather than addressing the particular language communication mode employed by the student. Consequently, examinees from other cultures, those who have speech limitations, or those who use nonstandard English are not unfairly penalized. Ages 5 years 0 months to 17 years 11 months.

Handbook of Educational Psychology and Students with Special Needs Andrew J. Martin, Rayne A. Sperling, Kristie J. Newton, 2020-02-18 Handbook of Educational Psychology and Students with Special Needs provides educational and psychological researchers, practitioners, policy makers, and graduate students with critical expertise on the factors and processes relevant to learning for students with special needs. This includes students with attention deficit hyperactivity disorder, other executive function difficulties, behavior and emotional disorders, autism spectrum disorder, intellectual disabilities, learning disabilities, dyslexia, language and communication difficulties, physical and sensory disabilities, and more. With the bulk of educational psychology focused on

mainstream or typically developing learners relatively little educational psychology theory research measurement or practice has attended to students with special needs As clearly demonstrated in this book the factors and processes studied within educational psychology motivation and engagement cognition and neuroscience social emotional development instruction home and school environments and more are vital to all learners especially those at risk or disabled Integrating guidance from the DSM 5 by the American Psychiatric Association and the International Classification of Diseases ICD 10 by the World Health Organization this book synthesizes and builds on existing interdisciplinary research to establish a comprehensive case for effective psycho educational theory research and practice that address learners with special needs Twenty seven chapters by experts in the field are structured into three parts on diverse special needs categories perspectives from major educational psychology theories and constructs relevant to special needs learning development and knowledge building

Uncommon Core Michael W. Smith, Deborah Appleman, Jeffrey D. Wilhelm, 2014-04-15 Let's face it weak rivets notwithstanding the Titanic wouldn't have sunk if the iceberg had been spotted in time And let's face it the CCSS won't be classroom worthy unless practitioners chart our course Depend on Michael Smith Deborah Appleman and Jeff Wilhelm to help you navigate through some potentially treacherous waters Uncommon Core puts us on high alert about some outright dangerous misunderstandings looming around so called standards aligned instruction then shows us how to steer past them all in service of meeting the real intent of the Common Core Smith Appleman and Wilhelm counter with teaching suggestions that are true to the research and true to our students including how Reader based approaches can complement text based ones Prereading activities can help students meet the strategic and conceptual demands texts place on them Strategy instruction can result in a careful and critical analysis of individual texts while providing transferable understandings Inquiry units around essential questions can generate meaningful conversation and higher order thinking about those texts Selection criteria that consider interpretive complexity can take us so much farther than those that consider textual complexity alone Given the number of strategies lesson ideas and activities in the book Uncommon Core is really less about the standards and more about timeless excellent teaching and how to use it like never before to meet the Core ideals Let's put instruction where it belongs back in the hands of the experts Finally A book with more light than heat on the issue of standards and their implications for learning GRANT WIGGINS Coauthor of *Understanding by Design* *Handbook of Individual Differences in Reading* Peter Afflerbach, 2015-08-11 The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge operate interact and change The scant

comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area Human Behavior, Learning, and the Developing Brain Donna Coch, Kurt W. Fischer, Geraldine Dawson, 2010-06-15 Synthesizing the breadth of current knowledge on brain behavior relationships in atypically developing children this important volume integrates theories and data from multiple disciplines Leading authorities present their latest research on specific clinical problems including autism Williams syndrome learning and language disabilities ADHD and issues facing infants of diabetic mothers In addition the effects of social stress and maltreatment on brain development and behavior are thoroughly reviewed Demonstrating the uses of cuttingedge methods from developmental neuroscience developmental psychology and cognitive science the contributors emphasize the implications of their findings for real world educational and clinical practices

Mind, Brain, and Education Science Tracey Tokuhama-Espinosa, 2010-12-20 Establishing the parameters and goals of the new field of mind brain and education science A groundbreaking work Mind Brain and Education Science explains the new transdisciplinary academic field that has grown out of the intersection of neuroscience education and psychology The trend in brain based teaching has been growing for the past twenty years and has exploded in the past five to become the most authoritative pedagogy for best learning results Aimed at teachers teacher trainers and policy makers and anyone interested in the future of education in America and beyond Mind Brain and Education Science responds to the clamor for help in identifying what information could and should apply in classrooms with confidence and what information is simply commercial hype Combining an exhaustive review of the literature as well as interviews with over twenty thought leaders in the field from six different countries this book describes the birth and future of this new and groundbreaking discipline Mind Brain and Education Science looks at the foundations standards and history of the field outlining the ways that new information should be judged Well established information is elegantly separated from neuromyths to help teachers split the wheat from the chaff in classroom planning instruction and teaching methodology
