Logic, Language, and Computation Martin Aher, Daniel Hole, Emil Jeřábek, Clemens Kupke, 2015-05-04 This book constitutes the refereed proceedings of the 10th International Tbilisi Symposium on Logic Language and Computation TbiLLC 2013 held in

Gudauro Georgia in September 2013 The conference series is centered around the interaction between logic language and computation The contributions represent these three fields and the symposia aim to foster interaction between them The book consists of 16 papers that were carefully reviewed and selected from 26 submissions Each paper has passed through a rigorous peer review process before being accepted for publication The volume also contains two summaries of the tutorials that took place at the symposium the one on admissible rules and the one on the formal semantics of aspectual meaning from a cross linguistic perspective

Structuring the Lexicon Dagmar Divjak, 2010 Structuring the Lexicon presents a cognitively realistic clustered model for near synonymy that explicitly addresses the question of how semantic knowledge is distributed along the continuum from grammar to lexicon Usage based in nature it proposes

Current Studies in Slavic Linguistics Irina Kor Chahine, 2013-12-15 This volume represents an overview of current research on Slavic linguistics in Europe and North America based on selected papers presented during the 6th Annual Meeting of the Slavic Linguistics Society September 1-3 2011 Aix en Provence France It includes topics across a range of linguistic fields morphosyntax syntax and semantics and discussions on specific aspects of Slavic languages within a typological perspective All the papers illustrate a range of approaches and each paper presents rigorous analysis of a set of Slavic data within the context of various models and aspects of language While the main focus of the collection is impersonal constructions in Slavic languages the book also includes morphological topics such as reflexives antipassive and evidential markers syntactical relations with zero sign auxiliary verbs and subordinate clauses and semantics of nouns adverbs and adjectives The volume will be of interest to all scholars studying Slavic languages as well as those interested in general linguistics and linguistic typology

Cognitive Linguistics in Action Elzbieta Tabakowska, Michal Choinski, Lukasz Wiraszka, 2010-09-22 In view of the considerable number of recent publications devoted to various applications of Cognitive Linguistics the book focusses on fields that have not been extensively dealt with within the CL framework The book gathers presentations that deal with fields of application as defined in the introduction to the first volume in the ACL series Kristiansen et al 2006 The articles in the first section From loop to cycle are defining papers written by eminent scholars whose position within the field of CL has been firmly established They touch upon issues of continuing relevance to the discipline and introduce thematic areas covered in the next four sections of the volume Papers in these sections are mainly written by young scholars whose research illustrates various ways to implement the cycle through different forms of contextualization either presenting descriptive applications that lead to theoretical amendments or widening the field of possible applications often interdisciplinary e g to theological or metaphysical discourse Frequently section papers provide illustration for the empirical turn in Cognitive Linguistics demonstrating the ways in which application of theory to new data using new methodologies leads to refinement development or modification of the theoretical framework The book is of relevance to students of applied linguistics interested or specializing in language acquisition and pedagogy intercultural communication literary and translation studies

as well as to academics and students representing cognate disciplines *What is Applied Cognitive Linguistics?* Andrea Tyler, Lihong Huang, Hana Jan, 2018-04-23 Many SLA professionals remain unaware of what CL and Applied Cognitive Linguistics are and of the tremendous potential these approaches offer for our understanding of L2 learning and pedagogy The volume addresses this gap by presenting theoretically grounded empirically based studies which illustrate the application of key concepts of CL and demonstrate the efficacy of using the concepts in the classroom or in basic L2 research

Cognitive Linguistics between Universality and Variation Mario Brdar, Milena Žic Fuchs, Ida Raffaelli, 2012-11-15 This volume takes up the challenge of assessing the present state of Cognitive Linguistics on the cutting edge between universality and variability Claims of universality have never been explicitly articulated by cognitive linguists but studies on embodiment motivation and cognitive processes such as metaphor metonymy and conceptual integration rely on general cognitive abilities and hence tacitly assume cross linguistic commonalities Variability within a language and across languages has received growing attention especially in contrastive and corpus based studies Both perspectives are given ample space in the articles collected in the volume The present volume is the first to address the important issue of the position of Cognitive Linguistics between the poles of universality and variability The editors insightful introduction draws compelling awareness to this as a yet unresolved question At the same time the fine contributions collected in the volume reflect state of the art research in Cognitive Linguistics and point to innovative avenues for future research The interdisciplinary range of subject areas the new approaches pursued and the various methodologies employed makes this volume particularly valuable It should be of great interest to scholars working in the fields of Cognitive Linguistics and in specific languages particularly English and Slavic linguistics G nter Radden University of Hamburg Ten Lectures on Cognitive Linguistics as an Empirical Science Laura A. Janda, 2018-06-05 Ten Lectures on Cognitive Linguistics as an Empirical Science details the relationship between form and meaning in language especially at the systematic level of morphology The role of metaphor and metonymy in elaborating meaning are investigated as well as the structuring of semantics in terms of prototypes and radial categories Implications for cultural studies and pedagogical applications are explored The bulk of examples and data are drawn from the Slavic languages **Slavic Languages in Psycholinguistics** Tanja Anstatt, Anja Gattnar, Christina Clasmeier, 2016-06-13 Psycholinguistics explores the anchoring of language in cognition The Slavic languages are an attractive topic for psycholinguistic studies since their structural characteristics offer great starting points for the development of research on speech processing The research of these languages with experimental methods is however still in its infancy This book provides an insight into the current research within this field On one hand central topic is the question of how Slavic languages can contribute to psycholinguistic findings On the other hand all chapters introduce their respective psycholinguistic method and discuss it according to its usefulness and transferability to the Slavic languages The researched languages are mainly Russian and Czech however other languages e g Polish Belarusian or Bulgarian are touched upon as

well Main topics are the characteristics of the mental lexicon multilingualism word recognition and sentence comprehension Furthermore several contributions address the issue of verbal aspect and aktionsarten as well as other grammatical categories
