attention to the continual conflict between camps that argue for the intentionality or meaning of emotions but have trouble explaining their presence in non human animals and those that argue for the universality of emotions but struggle when the question turns to meaning Addressing the work of key figures from across the spectrum considering the potentially misleading appeal of neuroscience for those working in the humanities and bringing her story fully up to date by taking in the latest debates Leys presents here the most thorough analysis available of how we have tried to think about how we feel

Immortal Souls Edward Feser, 2024-09-04 Immortal Souls provides as ambitious and complete a defense of Aristotelian Thomistic philosophical anthropology as is currently in print Among the many topics covered are the reality and unity of the self the immateriality of the intellect the freedom of the will the immortality of the soul the critique of artificial intelligence and the refutation of both Cartesian and materialist conceptions of human nature Along the way the main rival positions in contemporary philosophy and science are thoroughly engaged with and rebutted Reviews Edward Feser's book is a Summa of the nature of the human person it is therefore both a rather long but brilliant monograph and a valuable work for consultation Each of the human faculties discussed is treated comprehensively with a broad range of theories considered for and against and although Feser's conclusions are firmly Thomistic one can derive great benefit from his discussions even if one is not a convinced hylomorphist Every philosopher of mind would benefit from having this book within easy reach Howard Robinson Professor Emeritus of Philosophy Central European University Feser defends the Aristotelian and Thomistic system effectively bringing it into dialogue with recent debates and drawing on some of the best of both analytic Kripke Searle BonJour Fodor and phenomenological Heidegger Merleau Ponty Dreyfus philosophy He deftly rebuts objections to Thomism both ancient and modern Anyone working today on personal identity the unity of the self the semantics of cognition free will or qualia will need to engage with the analysis and arguments presented here Robert C Koons Professor of Philosophy University of Texas at Austin Local Educational Order Stephen K. Hester, David Francis, 2000-07-15 The studies in this book take an ethnomethodological approach to educational phenomena Ethnomethodology's concern is with the locally accomplished and situated character of social order With reference to educational phenomena this means that ethnomethodology investigates how the natural facts of educational life such as daily activities in school classrooms are produced as such in the first place rather than taking for granted the recognisability of these facts and then theorising their explanation In this sense ethnomethodological studies contrast markedly with other approaches to the study of education Each of the chapters in the book consists of a new and original study Collectively they exhibit the continuing vitality of this tradition and demonstrate ethnomethodology s special commitment to the analysis of educational phenomena as locally ordered and accomplished Postpsychiatry Patrick J. Bracken, Philip Thomas, 2005-12-22 For most of us the words madness and psychosis conjure up fear and images of violence Using short stories the authors consider complex philosphical issues from a fresh perspective The current debates about mental health policy and practice are placed into their historical and
