Critical Information Infrastructures Maitland Hyslop,2007-09-05 Resilience is an increasingly important concept and quality in today s world It is particularly important in the area of Critical Infrastructures It is crucial in the area of Critical Information Infrastructure This is because since the year 2000 man has been dependent on information and telecommunications systems for survival particularly in the Organization for Economic Cooperation and Development OECD countries and because all other Critical Inf structures depend upon to a greater or lesser extent Critical Information 1 2 Infrastructure Until probably the late 1980s it would be fair to say that the defense of individual nation states depended upon a mixture of political will and armed might The fall of the Berlin Wall may have effectively ended the Cold War and with it a

bipolar world but it brought globalization and a multipolar digital world in its wake Simply put a number of power vacuums were created and these have yet to be fully filled and settled In this New World many changes were afoot These changes include the increasing irrelevance of nation states in federated structures and the export of democracy on the back of globalization One of the biggest changes though is the use of digital technology by the OECD countries This is on such a scale that these countries have become both dependent upon information technology and as individual states largely irrelevant to the new global electronic economy 1 This adaptation of Maslow's hierarchy of needs is attributed to KPMG

Critical Information Infrastructure Protection and the Law National Academy of Engineering, National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee on Critical Information Infrastructure Protection and the Law, 2003-04-21 All critical infrastructures are increasingly dependent on the information infrastructure for information management communications and control functions Protection of the critical information infrastructure CIIP therefore is of prime concern To help with this step the National Academy of Engineering asked the NRC to assess the various legal issues associated with CIIP These issues include incentives and disincentives for information sharing between the public and private sectors and the role of FOIA and antitrust laws as a barrier or facilitator to progress The report also provides a preliminary analysis of the role of criminal law liability law and the establishment of best practices in encouraging various stakeholders to secure their computer systems and networks
