, **Electronic Commerce and Web Technologies** Kurt Bauknecht, Sanjay Kumar Madria, Günther Pernul, 2003-06-29 This volume includes the papers accepted for the First International Conference on Electronic Commerce and Web Technologies which was held in Greenwich UK on September 4 6 2000 The conference is the first of a series of planned conferences on these topics with the goal to bring together researchers from academia practitioners and commercial developers from industry and users to assess current methodologies and explore new ideas in e commerce and web technology The conference attracted 120 papers from all over the world and each paper was reviewed by at least three program committee members for its merit The program committee finally selected 42 papers for presentation and inclusion in these conference proceedings The conference program consisted of 14 technical sessions and two invited talks spread over three days The regular sessions covered topics such as web application design intellectual property rights security and fairness distributed organizations web usage analysis modelling of web applications electronic commerce success factors electronic markets XML web mining electronic negotiation integrity and performance facilitating electronic commerce and mobile electronic commerce There were two invited addresses at the conference The first was by Anthony Finkelstein University College London UK on A Foolish Consistency Technical Challenges in Consistency Management This was a common address to the DEXA the DaWaK and the EC Web attendees The second talk was by Paul Timmers European Commission Information Technologies Directorate on The Role of Technology for the e Economy *Wealth, Poverty and Politics* Thomas Sowell, 2016-09-06 In *Wealth Poverty and Politics* Thomas Sowell one of the foremost conservative public intellectuals in this country argues that political and ideological struggles have led to dangerous confusion about income inequality in America Pundits and politically motivated economists trumpet ambiguous statistics and sensational theories

while ignoring the true determinant of income inequality the production of wealth We cannot properly understand inequality if we focus exclusively on the distribution of wealth and ignore wealth production factors such as geography demography and culture Sowell contends that liberals have a particular interest in misreading the data and chastises them for using income inequality as an argument for the welfare state Refuting Thomas Piketty Paul Krugman and others on the left Sowell draws on accurate empirical data to show that the inequality is not nearly as extreme or sensational as we have been led to believe Transcending partisanship through a careful examination of data Wealth Poverty and Politics reveals the truth about the most explosive political issue of our time

Religion and Cyberspace Morten Hojsgaard, Margit Warburg, 2005-09-15 In the twenty first century religious life is increasingly moving from churches mosques and temples onto the Internet Today anyone can go online and seek a new form of religious expression without ever encountering a physical place of worship or an ordained teacher or priest The digital age offers virtual worship cyber prayers and talk boards for all of the major world faiths as well as for pagan organisations and new religious movements It also abounds with misinformation religious bigotry and information terrorism Scholars of religion need to understand the emerging forum that the web offers to religion and the kinds of religious and social interaction that it enables Religion and Cyberspace explores how religious individuals and groups are responding to the opportunities and challenges that cyberspace brings It asks how religious experience is generated and enacted online and how faith is shaped by factors such as limitless choice lack of religious authority and the conflict between recognised and non recognised forms of worship Combining case studies with the latest theory its twelve chapters examine topics including the history of online worship virtuality versus reality in cyberspace religious conflict in digital contexts and the construction of religious identity online Focusing on key themes in this groundbreaking area it is an ideal introduction to the fascinating questions that religion on the Internet presents

Email and Ethics Emma Rooksby, 2003-08-27 E mail and Ethics explores the ways in which interpersonal relations are affected by being conducted via computer mediated communication The advent of this channel of communication has prompted a renewed investigation into the nature and value of forms of human association Rooksby addresses these concerns in her rigorous investigation of the benefits limitations and implications of computer mediated communication With its depth of research and clarity of style this book will be of essential interest to philosophers scholars of communication cultural and media studies and all those interested in the importance and implications of computer mediated communication

Wired Shut Tarleton Gillespie, 2009-09-18 How the shift toward technical copy protection in the battle over digital copyright depends on changing political and commercial alignments that are profoundly shaping the future of cultural expression in a digital age While the public and the media have been distracted by the story of Napster warnings about the evils of piracy and lawsuits by the recording and film industries the enforcement of copyright law in the digital world has quietly shifted from regulating copying to regulating the design of technology Lawmakers and commercial interests are pursuing what might be called a

technical fix instead of specifying what can and cannot be done legally with a copyrighted work this new approach calls for the strategic use of encryption technologies to build standards of copyright directly into digital devices so that some uses are possible and others rendered impossible In *Wired Shut* Tarleton Gillespie examines this shift to technical copy protection and its profound political economic and cultural implications Gillespie reveals that the real story is not the technological controls themselves but the political economic and cultural arrangements being put in place to make them work He shows that this approach to digital copyright depends on new kinds of alliances among content and technology industries legislators regulators and the courts and is changing the relationship between law and technology in the process The film and music industries he claims are deploying copyright in order to funnel digital culture into increasingly commercial patterns that threaten to undermine the democratic potential of a network society In this broad context Gillespie examines three recent controversies over digital copyright the failed effort to develop copy protection for portable music players with the Strategic Digital Music Initiative SDMI the encryption system used in DVDs and the film industry's legal response to the tools that challenged them and the attempt by the FCC to mandate the broadcast flag copy protection system for digital television In each he argues that whether or not such technical constraints ever succeed the political alignments required will profoundly shape the future of cultural expression in a digital age

Youth Online Angela A. Thomas, Angela Thomas, 2007 *Youth Online* chronicles the stories of young people from several countries the US Australia Canada Switzerland and Holland and their interactions in online communities over a seven year period It examines how young people construct their identities in various social contexts social fantasy role playing and for various social purposes leadership learning power rebellion and romance It explores the ways youth are deploying both visual and literary cues to develop a full sense of presence online and to effectively communicate with their peers Using methods of textual visual and socio psychological analysis this book illuminates the ways in which young people are making sense of their own identities and their place within broader communities

The Science of Computing Matti Tedre, 2014-12-03 The identity of computing has been fiercely debated throughout its short history Why is it still so hard to define computing as an academic discipline Is computing a scientific mathematical or engineering discipline By describing the mathematical engineering and scientific traditions of computing *The Science of Computing Shaping a Discipline* presents a rich picture of computing from the viewpoints of the field's champions The book helps readers understand the debates about computing as a discipline It explains the context of computing's central debates and portrays a broad perspective of the discipline The book first looks at computing as a formal theoretical discipline that is in many ways similar to mathematics yet different in crucial ways It traces a number of discussions about the theoretical nature of computing from the field's intellectual origins in mathematical logic to modern views of the role of theory in computing The book then explores the debates about computing as an engineering discipline from the central technical innovations to the birth of the modern technical paradigm of computing to computing's arrival as a

new technical profession to software engineering gradually becoming an academic discipline It presents arguments for and against the view of computing as engineering within the context of software production and analyzes the clash between the theoretical and practical mindsets The book concludes with the view of computing as a science in its own right not just as a tool for other sciences It covers the early identity debates of computing various views of computing as a science and some famous characterizations of the discipline It also addresses the experimental computer science debate the view of computing as a natural science and the algorithmization of sciences

Understanding and Communicating Social Informatics

Rob Kling, Howard Rosenbaum, Steve Sawyer, 2005 Here is a sustained investigation into the human contexts of Information and Communication Technologies ICTs covering both research and theory in this emerging field Authors Kling Rosenbaum and Sawyer demonstrate that the design adoption and use of ICTs are deeply connected to people's actions as well as to the environments in which they are used In Chapters One and Two they define Social Informatics and offer a pragmatic overview of the discipline In Chapters Three and Four they articulate its fundamental ideas for specific audiences and present important research findings about the personal social and organizational consequences of ICT design and use Chapter Five covers Social Informatics education Chapter Six discusses ways to communicate Social Informatics to professional and research communities and Chapter Seven provides a summary and look to the future
