Changing Landscape School Leadership Recalibrating:

The Changing Landscape of School Leadership M. Scott Norton, 2015-12-31 The primary focus of the book is to emphasize the major changes in the leadership responsibilities of the school principal and to underscore the necessity for them to gain new knowledge and skills in order to direct their leadership toward meeting the new changes in school community goals and objectives M Scott Norton emphasizes the fact that contemporary issues and problems must be viewed as symptoms of change The symptoms represent administrative tasks that must be attacked by implementing the primary reason that the school principal is hired that of leading on going change The leader s responsibility focuses on school purposes as set forth in a viable school mission statement The school s mission statement that all too often is set forth as a public relations perspective must instead set forth answers to questions such as What is our purpose Why does our school exist What is our reason for being here How do we meet the on going changes that face us educationally The leadership of the school principal attacks the symptoms of change by collaborating with the school s faculty to set forth a mission to which all members can commit Collaboration infers a unification of members commitments toward the primary purposes of the school Collaboration and opportunities to confer on an on going basis are established Although the school principal s hands are often tied by such factors as lack of resources underfunded unfunded mandates inability to hire and retain highly qualified personnel and constantly changing program requirements related to student testing and teacher performance evaluation this book places emphasis on the principal s need to become a visionary change agent in order to attack the ever changing symptoms of educational change

Improving Education in a World of Politics M. Scott Norton, 2018-10-05 This book centers on the fact that public education is involved in the politics of the world just as other systems and organizations are involved in competing for the values and resources of the many communities Keeping education out of politics or politics out of education is fallacious As long as public education is financed by taxes local state or national it must compete with other agencies and programs for the available tax dollars These realities make it necessary for school leaders to be knowledgeable of how the values and resources of the school community are distributed This need calls for an understanding of how important decisions are made or not made that affect the outcomes of public education If public schools are to remain relevant and in the main stream of public issues and related decisional outcomes they must become more knowledgeable of the political world of education and how important decisions are determined regarding educational support
