A PC is downloading a large file from a server. The TCP window is 1000 bytes. The server is sending the file using 100-byte segments. How many segments will the server send before it requires an acknowledgment from the PC?

- 1 segment
- 10 segments*
- 100 segments
- 1000 segments

2

A host device needs to send a large video file across the network while providing data communication to other users. Which feature will allow different communication streams to occur at the same time, without having a single data stream using all available bandwidth?

- multiplexing *
- window size
- acknowledgments
- port numbers

3

A technician wishes to use TFTP to transfer a large file from a file server to a remote router. Which statement is correct about this scenario?

- The file is segmented and then reassembled in the correct order by TCP.
- The file is not segmented, because UDP is the transport layer protocol that is used by TFTP.
- Large files must be sent by FTP not TFTP.
- The file is segmented and then reassembled in the correct order at the destination, if necessary, by the upper-layer protocol.*
