Item #31143

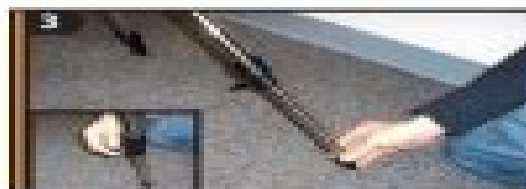

Quick Set-up Guide

Your NexStar 114SLT includes: optical tube; fork arm; pre-assembled tripod; computerized hand control; hand control holder; two eyepieces; finderscope; accessory tray; documentation including an owner's manual, The Sky™ CD and N50i, Telescope Control Software.

Assemble tripod by spreading the legs out until the center leg brace is fully extended.

Extend tripod legs 6 to 8 inches by loosening the tripod leg locking knob and pulling the leg to desired length and re-tightening knob.

All three legs should be the same length to provide a level platform for the telescope. A bubble level is included (next) to assist in leveling.

Place accessory tray on top of center leg brace by lining up the grooves on the tray to the post on the brace.

Once grooves are aligned, turn accessory tray until it snaps into clips on each leg brace.

Hold the telescope fork arm and place the bottom of the base inside the tripod mounting platform as shown.

Thread the coupling screw into the hole at the bottom of the fork arm base. Tighten screw to secure the entire fork arm.

Slide the optical tube dovetail into the fork arm as shown above.

Like I say in my second book this is not a book about Astronomy though. There are many good books about beginning Astronomy and learning the night sky. This book is about common problems you may run into.

when starting Astronomy with a new telescope It specifically addresses some items you may run into when setting up and using a Celestron NexStar 8se telescope which is a great telescope for pursuing Astronomy Some items covered for the Celestron NexStar 8se telescope also apply to other Celestron telescope models This is not intended to be a replacement for your manual Be sure to follow the manual as much as possible This book contains helpful information that is not detailed in the manual that will hopefully save you some time and frustration The format of this book is simple It contains a list of questions with a discussion of how to resolve the problem at hand
