Hair Follicle K. Morioka,2006-03-21 Each and every hair is much more than just the visible shaft there are also associated complex sheath structures of epidermal and dermal origin In the hair follicle cells undergo a variety of differentiation processes mostly depending on their layers and positions therein and electron microscopy reveals a very complex architecture The structure of a particular layer such as Henle s layer of the inner root sheath is not uniform Rather cells drastically change during the course of differentiation By simply comparing electron micrographs of cells of a layer at different degrees of differentiation one can hardly recognize them as belonging to the same layer As readers will see this book contains many superb electron mic graphs from low magni cation panoramic views for orientation to hi power views showing ultrastructural detail Captions and schematic drawings are also very helpful in reading electron micrographs and derstanding the structural detail In this way Dr Morioka has succeeded in dissecting the complex hair follicle at the ultrastructural level
