- A Square Transmitter, 8 1/2 in. x 3 1/2 in.
- B Sound Transmitter, 7 1/2 in. dia.
- C Transmitter Cord.
- D Sound Regulator and Connection Block.
- E Battery Standard General Armature Co.
- F Battery Cord.
- G Ear Piece Cord.
- H Ear Piece Front View.
- I Ear Piece Back View.
- J Adjustable Head Band.

HOW TO SET UP DICTOGRAPH

The above diagram shows the Dictograph properly assembled and ready for use. A following number merely of getting the right plugs in the right holes. To facilitate this a tag is attached to each wire and showing just where that plug shall be plugged in. For instance, at one end of the long cord (F) is a tag which reads "Transmitter Lead." It is to be plugged into Transmitter. At one end of the Piece cord a tag is attached which reads "to use this end in connection for Sound Controller", etc. The Transmitter, Receiver and Battery terminals are plainly indicated on Sound Controller. Care should be taken to see that the tagged wire ends are plugged into the holes marked to receive them.

It will be noted that the two plugs at each wire end are of different sizes and fit into different sized holes. This is to prevent positive current plugs getting into negative current holes, and vice versa.

Caution: It is important to have plugs firmly inserted. Push in and turn slightly to the right before pressure is removed, and no slipping.

HOW TO INSTALL DICTOGRAPH

The Transmitter is the part of the apparatus to be installed in the room or place where it is expected the conversation to be overheard will take place. Both the Transmitter and its wire must be concealed. The Transmitter may be hidden in the drawer of a desk, behind a picture, back of a radiator, a bureau, under a bed. A favorite way to conceal the cord is to run it along the top of bookshelves, under couch cushions, along baseboards, and, where they exist, in cracks of the floor. Sometimes it is advisable to drill a small hole through a tile wall in order to pass the wire into adjoining room. Many ways of concealing the Transmitter and its wire will suggest themselves. If your case presents special difficulties, the Company will advise you what to do through its Detective Service Department.

Two Transmitters are furnished. The smaller one is to be used where space is not available to effectively conceal the larger one. Where the room is small, use the small Transmitter; use the large Transmitter in a large room. It is more powerful and has a wider range.

Caution: In all cases Transmitter must be installed in a vertical position. It will not work in any other position.

HOW TO USE DICTOGRAPH

Switching on Ear Phones: When ready to listen they must be turned "ON." When not in use turn "OFF" in order to save battery current.

Sound Controller: It does for the user what the focusing apparatus of a camera does for the eye. Move controller lever to "Land" or "Soft" until you get the best results. It will be found that when the conversation is loud by moving controller toward "Soft" the vibrations will be modulated and given in softness. When whispers' voices are low, push lever toward "Land" in order to have the vibrations transmitted more powerfully.

Listening: Set up the Dictograph and practice a few times before making installation in order to give the ear an opportunity to adjust itself to the extremely delicate vibrations carried by the powerful transmission system.

Interrupting Vibrations: When they are strong enough to interfere with studies, sleep, etc., or used before sound transmitters to eliminate the foreign voice.
