La ciencia y El Quijote José Manuel Sánchez Ron, Antonio J. Duran, 2005 Son incontables los libros dedicados a analizar El Quijote en sus coordenadas literarias históricas

y sociales pero nunca hasta ahora se había intentado relacionarlo con la ciencia la técnica y la medicina de su tiempo En este libro dirigido por Jos Manuel Sánchez Ron los mayores expertos sobre estas cuestiones a los que se ha unido un excepcional conocedor de El Quijote y de la literatura como es Arturo Pérez Reverte nos descubren la riqueza y la variedad de contenidos científicos que presenta el inmortal libro de Cervantes desde la astronomía a la botánica o la zoología pasando por las matemáticas la cartografía la alimentación o la minería y nos ilustran sobre el papel de los conocimientos científicos en la España de los siglos XVI y XVII

Descripción Resumen Español Castellano Los trabajos que el lector encontrar reunidos en el presente volumen son prolongación de las líneas de investigación abordadas previamente por la red hispanoalemana Saberes humanísticos y formas de vida El objeto de estudio en esta ocasión es la relación entre literatura ciencia y pensamiento en los siglos XVI XVIII basándose por la mayor parte en textos y formas de divulgación que tratan aspectos mágicos y escpticos Como es sabido el estudio de la literatura en muchas ocasiones no es únicamente literario ni siquiera humanístico sino que se vincula también con el horizonte científico y la episteme de cada época En los siglos XVI XVIII literatura ciencia y pensamiento estaban imbricados en las obras de muchos escritores cuyos intereses iban más allá de lo propiamente literario interesándose por la medicina la astrología o la astronomía entre otras opciones científicas Autores que ahora consideramos científicos fueran tenidos por hombres de letras o humanistas en un momento en que literatura y ciencia iban de la mano Al estudio de esa feliz convergencia va dedicado el volumen Descripción Resumen Catalán Els treballs que el lector trobar reunits en el present volum són prolongació de les línies de recerca abordades prèviament per la xarxa hispanoalemana Sabers humanístics i formes de vida L'objecte d'estudi en aquesta ocasió és la relació entre literatura ciència i pensament en els segles XVI XVIII basant-se per la major part en textos i formes de divulgació que tracten aspectes mágics i escptics Com és sabut l'estudi de la literatura en moltes ocasions no és únicament literari ni tan sols humanístic sin que es vincula també amb l'horitzó científic i l'episteme de cada poca Als segles XVI XVIII literatura ciència i pensament estaven imbricats en les obres de molts escriptors els interessos anaven més enllà del que s'prpiament literari interessant se per la medicina l'astrologia o l'astronomia entre altres opcions científiques Autors que ara considerem científics fossin tinguts per homes de lletres o humanistes en un moment en què literatura i ciència anaven de la mà Al estudi d'aquesta feli convergència va dedicat el volum Descripción Resumen Inglés The works that the reader will find in this volume are a continuation of the

lines of research previously addressed by the Spanish German network Humanistic knowledge and ways of life The object of study on this occasion is the relationship between literature science and thought in the XVI XVIII centuries based for the most part on texts and forms of dissemination that deal with magical and skeptical aspects As is well known the study of literature in many cases is not only literary not even humanistic but is also linked to the scientific horizon and the episteme of each era In the sixteenth eighteenth centuries literature science and thought were imbricated in the works of many writers whose interests went beyond the strictly literary interested in medicine astrology or astronomy among other scientific options Authors that we now consider scientists were considered men of letters or humanists at a time when literature and science went hand in hand The volume is dedicated to the study of that happy convergence **La ciencia de Cervantes**

Vicente Pérez de León, 2022-10-31 La vía del conocimiento de la filosofía a natural contrarreformista estuvo condicionada por la necesidad de conciliar el método escolástico con el experimental a la luz de la evidencia de los nuevos descubrimientos científicos y geográficos La cosmografía oficial hizo uso de metodologías del saber basadas en discursos como el antipersticioso en el que se apuntaba a la confluencia de métodos experimentales religiosos y jurídicos orientados hacia una interpretación más precisa de la realidad En La ciencia de Cervantes se confirma cómo en pasajes que describen exorcismos interacciones entre animales y seres humanos y exploraciones geográficas de obras cervantinas como Don Quijote Persiles y Sigismunda y las Novelas ejemplares la confluencia de visiones artísticas y científicas de la época se pone de manifiesto Llama la atención especialmente el caso del Coloquio de los perros en donde se evidencia un intento de conciliar el conocimiento humanista escolástico antipersticioso y barroco en línea con otras excepcionales obras neoplatónicas similares como son tanto el Somnium de Maldonado como el de Kepler The Counter reformation path to natural philosophy was increasingly conditioned by its need to reconcile the scholastic method with the experimental one at the light of the evidence of new scientific and geographic discoveries Official world view was supported by approaches to knowledge such as the anti superstitious discourse which were sustained by the confluence of experimental religious and legal methodologies in support of a more accurate interpretation of reality La ciencia de Cervantes shows how selected cervantine texts including the Quixote Persiles and Sigismunda and the Exemplary Novels reflect how the confluence of artistic and scientific views of the period was evidenced in the depiction among others of exorcisms animal human interactions and geographical explorations Particularly relevant is the case of the Colloquy of the Dogs showing an attempt to reconcile the conflictive confluence of Humanistic Scholastic anti superstitious and baroque knowledge in line with other unique Neoplatonist works such as Maldonado's and Kepler's Somnium **El Quijote y el pensamiento teórico-literario** Miguel Ángel Garrido
