Citizens Of Fear Urban Violence In Latin America:

Citizens of Fear Susana Rotker, Katherine Goldman, 2002 Citizens in Latin American cities live in constant fear amidst some of the most dangerous conditions on earth In that vast region 140 thousand people die violently each year and one out of three citizens have been directly or indirectly victimized by violence In Venezuela adults are on average targets of crime seventeen crimes in their lifetimes four of which are violent In Mexico 97 percent of all reported crimes go unpunished Crime in effect is an undeclared war Citizens of Fear in part assembles survey results of social scientists who document the pervasiveness of violence But the numbers tell only part of the story Other contributors present moving testimonials by the victimized and by journalists covering the scene A third group of essayists explores the implications of the resulting fear for both thought and behavior As Susana Rotker writes The city has been transformed into a space of vulnerability and danger What I am interested in narrating here is the generalized sensation of insecurity that taints the Latin American capitals the sensation that has changed the ways people relate to urban space to other human beings to the state and to the very concept of citizenship

Urban Violence and Insecurity Caroline O N Moser, 2004

Encounters with Violence in Latin America Cathy McIlwaine, Caroline Moser, 2004-08-02 Considers the various types of political social and economic violence that afflict communities and measures the costs and consequences of violence giving a voice to those whose daily lives are dominated by widespread aggression

Violence and Crime in Latin America Gema Santamaría, David Carey, 2017-02-21 According to media reports Latin America is one of the most violent regions in the world a distinction it held throughout the twentieth century The authors of Violence and Crime in Latin America contend that perceptions and representations of violence and crime directly impact such behaviors creating profound consequences for the political and social fabric of Latin American nations Written by distinguished scholars of Latin American history sociology anthropology and political science the essays in this volume range from Mexico and Argentina to Colombia and Brazil in the twentieth and twenty first centuries addressing such issues as extralegal violence in Mexico the myth of indigenous criminality in Guatemala and governments selective blindness to violent crime in Brazil and Jamaica The authors in this collection examine not only the social construction and political visibility of violence and crime in Latin America but the justifications for them as well Analytically and historically these essays show how Latin American citizens have sanctioned criminal and violent practices and incorporated them into social relations everyday practices and institutional settings At the same time the authors explore the power struggles that inform distinctions between illegitimate versus legitimate violence Violence and Crime in Latin America makes a substantive contribution to understanding a key problem facing Latin America today In its historical depth and ethnographic reach this original and thought provoking volume enhances our understanding of crime and violence throughout the Western Hemisphere

Violence and Resilience in Latin American Cities Kees Koonings, Dirk Kruijt, 2015-11-15 Why are Latin American cities amongst the most violent in the world Over the past decades Latin America

has not only become the most urbanised of the regions of the so called global South it has also been the scene of the urbanisation of poverty and exclusion Overall regional homicides rates are the highest in the world a fact closely related to the spread and use of firearms by male youths who are frequently involved in local and translocal forms of organised crime In response governments and law enforcements agencies have been facing mounting pressure to address violence through repressive strategies which in turn has led to a number of consequences law enforcement is often based on excessive violence and the victimisation of entire marginal populations Thus the dynamics of violence have generated a widespread perception of insecurity and fear Featuring much original fieldwork across a broad array of case studies this cutting edge volume focuses on questions not only of crime insecurity and violence but also of Latin American cities ability to respond to these problems in creative and productive ways

Violence at the Urban Margins Javier Auyero,Philippe Bourgois,Nancy Scheper-Hughes,2015-03-09 In the Americas the middle and upper middle classes and their concerns dominate debates around public safety However even a cursory count of the victims reveals that the people suffering the most from violence live and die at the margins of urban societies While those at the low end of the social order live in danger the discourse about violence and risk belongs to more advantaged others prone to view violence as evidence of a cultural or racial defect rather than see a relationship to economic and political marginalization As a result the experience of interpersonal violence among the urban poor is constantly muted and denied This volume of essays brings forth the everyday fear and trauma of living in relegated territories It features cutting edge ethnographic research on the role of violence in the lives of the urban poor in South Central and North America and sheds light on the suffering that violence produces and perpetuates as well as the individual and collective responses that violence generates among those living at the urban margins

Linking Political Violence and Crime in Latin America Kirsten Howarth,Jenny H. Peterson,2016-03-10 This edited collection explores the politics of crime and violence in Latin America through both theoretical reflections as well as several detailed case studies based on empirical primary research Its overall aim is to explore common misperceptions and simplifications which are often found in political discourses policy documentation as well as some academic work These simplifications include a focus on gangs narrow understandings of organized criminal groups and the knock on effect that such a focus has on policy making Instead the chapters in this book shift the reader s gaze to more structural explanations and analytical approaches moving them towards an understanding of how wider historical economic cultural and even psychological issues impact the complex relationships between crime violence and politics in the region The detailed case studies also allow for a unique comparative analysis of problems faced throughout the region While significant differences exist analysis of the case studies reveals common issues problems and debates between countries including structural violence militarization and neo liberalism These golden threads reveal not only the complexity of crime and violence in the region but also expose the failure of the overly simple gangsterism discourse found elsewhere Finally and importantly several of the chapters explore the politics of policy

making in relation to these problems shedding light on the complex reasons for policy failures and highlighting innovative opportunities for change Whilst shedding light on current problems in the region the book also offers a range of analytical approaches for exploring other cases where crime violence and politics collide

Latin American Urban Development into the Twenty First Century D. Rodgers,J. Beall,R. Kanbur,2012-10-10 By the dawn of the 21st century more than half of the world s population was living in urban areas This volume explores the implications of this unprecedented expansion in the world s most urbanized region Latin America exploring the new urban reality and the consequences for both Latin America and the rest of the developing world

The ^AOxford Handbook of the Sociology of Latin America Xochitl Bada,Liliana Rivera-Sánchez,2021-04-09 The essays included in this volume provide both an assessment of key areas and current trends in sociology specifically with regard to contemporary sociology in Latin America as well as a collection of innovative empirical studies The volume serves as an effective bridge of communication allowing sociological academics to mobilize and disseminate research dynamics from Latin America to the rest of the world

Violent Democracies in Latin America Enrique Desmond Arias,Daniel M. Goldstein,2010-03-19 A collection exploring how individuals and institutions in contemporary Latin American democracies use violence to impose and contest notions of order rights citizenship and justice
