Come Together The Rise Of Cooperative Art And Design:

Come Together Francesco Spampinato, 2014-12-02 The past twenty years have seen a new generation of artists working together in small groups and large collectives to explore new avenues of art design performance and commerce In *Come Together* author and visual artist Francesco Spampinato assembles an international roster of forty of today's most exciting and influential collectives from design studios like Project Projects and political performance artists The Yes Men to flash mob provocateurs Improv Everywhere and the multimedia artists Assume Vivid Astro Focus Alongside visual portfolios of their best work are in depth interviews addressing each group's unique motivations processes and objectives What emerges is a shared desire to turn viewers into producers and to use commercial mass media strategies to challenge prevailing social political and cultural power structures *Come Together* is an essential resource and inspiration for students art lovers and anyone interested in the cutting edge of visual culture Popularizing Scholarly Research Patricia Leavy, 2021-08-31

Popularizing Scholarly Research Research Methods and Practice contextualizes the role of digital resources such as blogs social media and email in the move toward making scholarship accessible and explains the role of research methods in knowledge construction Topics covered in the book include survey research interviews oral history ethnography autoethnography evaluation literature visual art health theatre narrative film and a range of methods that rely on the internet and social media *The Oxford Handbook of Methods for Public Scholarship* Patricia Leavy, 2019 The Oxford Handbook of Methods for Public Scholarship presents the first comprehensive overview of research methods and practices for engaging in public scholarship The handbook features a wealth of highly respected interdisciplinary contributors as well as emerging scholars and chapters include robust examples from real world research in varied fields and cultures

Concrete and Water Jana Faßbender, Luca Marie Tüshaus, 2025-02-08 Organizations are not only functional structures but equally defined through their humans objects spaces and practices in relation with each other From this perspective Jana Faßbender and Luca Marie Tüshaus engage ethnographically and conceptually with the contemporary art exhibition documenta fifteen Offering a deep dive into its preparation execution and impact through immersive fieldwork they explore the exhibition's unique atmospheric forces and organizational aesthetics from within This rich and reflexive investigation is composed entirely in dialogue and proposes a new vocabulary of atmospheres in organizations Art vs. TV Francesco Spampinato, 2021-12-02 While highlighting the prevailing role of television in Western societies *Art vs TV* maps and condenses a comprehensive history of the relationships of art and television With a particular focus on the link between reality and representation Francesco Spampinato analyzes video art works installations performances interventions and television programs made by contemporary artists as forms of resistance to and appropriation and parody of mainstream television The artists discussed belong to different generations those that emerged in the 1960s in association with art movements such as Pop Art Fluxus and Happening and those appearing on the scene in the 1980s whose work aimed at

deconstructing media representation in line with postmodernist theories to those arriving in the 2000s an era in which through reality shows and the Internet anybody could potentially become a media personality and finally those active in the 2010s whose work reflects on how old media like television has definitively vaporized through the electronic highways of cyberspace These works and phenomena elicit a tension between art and television exposing an incongruence an impossibility not only to converge but at the very least to open up a dialogical exchange

Collaborative Production in the Creative Industries James Graham, Alessandro Gandini, 2017-06-29 In recent years research into creative labour and cultural work has usually addressed the politics of production in these fields but the sociotechnical and aesthetic dimensions of collaborative creative work have been somewhat overlooked This book aims to address this gap Through case studies that range from TV showrunning to independent publishing from the film industry to social media platforms such as Tumblr and Wattpad this collection develops a critical understanding of the integral role collaboration plays in contemporary media and culture It draws attention to diverse kinds of creative collaboration afforded via the intermediation of digital platforms and networked publics It considers how these are incorporated into emergent market paradigms and investigates the complicated forms of subjectivity that develop as a consequence But it also acknowledges historical continuities not least in terms of the continued exploitation of support personnel and of resulting artistic conflicts but also of alternative models that resist the precarious nature of contemporary cultural work Finally this volume attempts to situate creative collaboration in broader social and economic contexts where the experience and outcomes of such work have proved more problematic than the rich potential of their promise would lead us to expect

Holistic Sustainability Through Craft-Design Collaboration Rebecca Reubens, 2019-05-07 This book explores the intersection of craft design and sustainability in the developing world It argues that most sustainable design approaches and efforts fall short of implementing holistic sustainability and in order to reach this goal design must be underpinned by alternatives to the mainstream technology intensive industrial design paradigm Renewable materials such as bamboo cork and hemp which are abundantly available in the developing world have the potential to be a viable resource base for sustainable development Current sustainable design initiatives and approaches already recontextualize these materials using industrial techniques and technologies However these efforts fall short of impacting holistic sustainability and tend to focus on the ecological aspect This book offers the development of one alternative to design for holistic sustainability called the Rhizome Approach which draws on existing sustainability praxis and craft Holistic Sustainability Through Craft Design Collaboration includes customizable tools which aim to empower designers to guide and evaluate their own designs Through these tools and the Rhizome Approach in general the book aims to enable designers and students of design to move beyond green and sustainable design to holistic sustainability design

Computer Supported Collaborative Learning 2005 Timothy Koschmann, 2017-10-03 The Computer Supported Collaborative Learning CSCL conference has become an internationally recognized forum for the exchange of research findings related to learning

in the context of collaborative activity and the exploration of how such learning might be augmented through technology This text is the proceedings from CSCL 2005 held in Taipei Taiwan This conference marked the 10th anniversary of the first CSCL Conference held at Indiana University in 1995 Subsequent meetings have been held at the University of Toronto Stanford University University of Maastricht Netherlands University of Colorado at Boulder and the University of Bergen Norway Just as the first CSCL conference was instrumental in shaping the trajectory of the field in its first decade the conference in Taipei will play an important role in consolidating an increasingly international and interdisciplinary community and defining the direction of the field for the next 10 years This volume and the papers from which it is comprised will be an important resource for those active in this area of research and for others interested in fostering learning in settings of collaboration
