Crow Planet Essential Wisdom From The Urban Wilderness:

Crow Planet Lyanda Lynn Haupt, 2024-09-24 If you picture Henry David Thoreau as a young mother and scientist in suburban Seattle you can begin to imagine the literate elegance of *Crow Planet* Paul Hawken New York Times bestselling author There are more crows now than ever Their abundance is both an indicator of ecological imbalance and a generous opportunity to connect with the animal world *Crow Planet* reminds us that we do not need to head to faraway places to encounter nature Rather even in the suburbs and cities where we live we are surrounded by wild life such as crows and through observing them we can enhance our appreciation of the world's natural order *Crow Planet* richly weaves Haupt's own crow stories as well as scientific and scholarly research and the history and mythology of crows culminating in a book that is sure to make readers see the world around them in a very different way An inspired meditation on our own place in nature You will never look at crows in the same way again David R Montgomery The Washington Post In a lyrical narrative that blends science and conscience Haupt mourns the encroachments of urbanization but cherishes the wildness that survives Liesl Schillinger The New York Times Book Review With her sensitivity careful eye and gift for language Haupt tells her tale beautifully using crow study to get at a range of ever deepening concerns about nature and our place within it immersing us in a heady hybrid of science history how to and memoir Erika Schickel Los Angeles Times A completely charming and informative book on the pleasures of keeping one's eyes open David Sedaris

Unseen City Nathanael Johnson, 2016-04-05 It all started with Nathanael Johnson's decision to teach his daughter Josephine the names of every tree they passed as they walked up the hill to daycare in San Francisco CA it was a ridiculous project not just because she couldn't even say the word tree yet but also because he couldn't name a single one of them When confronted with the futility of his mission his instinctive response was to expand it Don Quixote style until its audacity obscured its stupidity And so the project expanded to include an expertise in city dwelling birds the raptors the shockingly shrewd crows the gulls the misunderstood pigeons rodents raccoons rats squirrels and tiny crawling things the superpowers of snails the vast intercontinental warfare of ants There's an unseen world all around us There are wonders that we walk past every day without noticing Johnson has written a book that will widen the pinhole through which we see the world What does the world look like through the eyes of a peregrine falcon or a raccoon or an ant What does a sidewalk Gingko balboa see What would you learn each morning if you understood how to speak pigeon If we look closely enough Johnson believes that the walk to the subway can be just as entrancing as a walk through the forest Follow along as the author and his family search for the beauty and meaning of nature in an urban jungle

Crows Margaret Peot, 2024-07-02 This book describes how crows meet mate nest raise their young and learn to fly and their unique way of communicating Crows are known to roost in large numbers in the fall and winter for safety protection from the weather and to find a mate Young crows start fledging when they are 30-40 days old sometimes tumbling to the ground when their flying skills have not yet developed Mature crows will mob predators to protect

Raven and Crow Ellen W. Williams,2025-10-14 Ravens and crows both members of the Corvidae family have long captured human imagination Ornithologists have noted their problem solving capabilities but the interest extends beyond science Artists are moved to depict them while backyard bird enthusiasts delight in their antics Found around the world the raven and the crow have inspired thousands of myths legends and fairytales These stories regard corvids as powerful beings with the crow sometimes seen as a witch or a goddess in disguise and the raven portrayed as a creator trickster being The fascination with these birds spans centuries and they are represented in mythology from every corner of the planet This book explores the multi dimensional aspects of ravens and crows they are the subject of scientific research as well as ancient texts and artwork From traditional and contemporary renderings of the birds in art to the wealth of mythology about them the enigmatic nature of the birds remains a point of fascination for many Recent scientific findings have revealed a use of language problem solving skills and the ability to count positioning these birds at the intersection of science mythology and art

Only Wonder Comprehends John Garvey,2018 For over forty years John Garvey was the ballast of Commonweal magazine His award winning essays and consistently notable columns revealed not only his acuity and alacrity but his uncommon spiritual insight These in turn provided momentum and substance for whatever followed in an issue of the magazine because Garvey never hesitated to wrestle with some of the most challenging and intractable topics of the day and did so with a rich pastoral sensitivity and a refreshing and rare intelligence Only Wonder Comprehends gleans from John Garvey s many contributions to Commonweal that reflect his spiritual depth and deep appreciation of history politics theology and culture Steeped in the Christian tradition Garvey loved to write and in return his readers relished what he wrote It is hoped that this collection of his writings from Commonweal will inspire readers to cultivate a similar sense of attentiveness and commitment for as the author himself observed Religious traditions are meant to transform us not to affirm us as we are

Encountering Earth Trevor George Hunsberger Bechtel,Matt Eaton,Tim Harvie,2018-05-14 One day Matthew Eaton was walking through an impromptu animal shelter display at his local pet store when suddenly an eight month old kitten dug his claws into Eaton s flesh Eaton recognized that the eyes of this cat and the curve of his claw compelled a response analogous to those found in the writings of Buber Levinas and Derrida And not just Eaton but a whole community of theologians have found themselves in an encounter with particular places and animals that demands rich theological reflection Eaton enlisted fellow editors Harvie and Bechtel to collect the essays in this volume in which theologians listen to horses rats snakes cats dogs and the earth itself who become new theological voices demanding a response In this volume the voice of the more than human world is heard as making theology possible These essays suggest that what we say theologically represents not simply ideas of our own making subsequently superimposed onto the natural world through our own discovery but rather flow from an expressive Earth
