the world's most intriguing and it rightfully sounds such as one of the most fascinating places on earth. And yes, it's a heck of a journey to reach this offshore Australian state, but once you're here, if you're adventurous, you won't want to leave. Indeed, the island state of Tasmania is ripe for adventure. A heart-shaped mountainous landmass 298 km (185 mi) southeast of the main Australian continent, it's covered with forests threaded with rivers and edged by wild, rugged beaches and bays. Its wilderness comprises an international Heritage Site of its own, filled with some of the world's oldest and most unusual plants and animals that are found nowhere else on earth, rock formations that span every geological era, and among the longest underground tunnels ever found. The capital of Hobart, where almost half the island's residents live, is tucked into the southeastern edge, and the sleepy northern ferry town of Devonport brings in visitors from the mainland. No one ventures far though, which leaves the majority of the island open to exploring and free of crowds, even at the loveliest of national wonders such as Tasman National Park in the southeast, Freycinet National Park in the east, and Franklin Gordon Wild Rivers National Park in the west.
