

Circulatory system

The **circulatory system** is made up of the heart and thousand of tubes called **arteries** and **veins**. The **blood** travels through arteries and veins and carries **oxygen** and **nutrients** to all parts of the **body**.

veins

arteries

The **heart** is made up of four sections: the left and right **atria**ms, and the left and right **ventric**les.

1. Read and label the pictures using the following words.

lungs

heart

veins

arteries

It is a hard working muscle that **pumps** **blood** to every **parts** of the **body**.

They carry **bright red** blood full of **oxygen** from the heart to all the **parts** of the **body**.

They return **blood** to the **heart**. This blood is **darker** (usually look **blue**) because they have **low oxygen**.

They take the **oxygen** we need to live.

Resources in Education ,2001-04 **Immersive Learning** Craig Frehlich,2020-09-10 Most people want to reach their maximum potential and the use of tools are no different Some say power is influence If this is true then virtual reality has superpowers because of its ability to make the unreal viscerally real engaging and immersive Thanks to these powers VR can influence and affect education in ways that no technology tool has in the past This book will help people understand the power and true potential of virtual reality or VR The prime directive of this book is to provide educators with a way of thinking about how to use virtual reality in education in order to reveal its true superpowers And to arm educators with several hands on lessons to get them started on implementing VR as a tool to enhance learning outcomes Ultimately the book aims to have educators clearly understand VR s role in transforming education thus reaching its maximum potential

Grading for Impact Tom Hierck,Garth Larson,2018-04-04 Aim for a target based grading system and create stronger learning opportunities Do you wish there was more clarity when it comes to measuring student progress and learning What if there was a way to utilize grading and assessment to focus on learning rather than performance and the process rather than the product As grading assessment and reporting continue to be relevant topics of discussion this book helps you create a functional plan to elevate and advance standards based grading practices Teachers and administrators will learn how to assess grade and report against specific learning targets rather than standards as a whole to make skill acquisition the highest priority Grounded in application to provide focus and clarity this book features Real case studies of schools that have incorporated target based assessment feedback grading and reporting Practical examples to guide implementation Questions checklists illustrations and audits of practice to showcase the work in action An accessible format and layout that support both immediate implementation and long term goals Despite being a topic that generates emotion and resistance to change target based assessment builds the foundation for a learner centered system that provides clear expectations and feedback for teachers students and parents Grading for Impact is a simple and straightforward guide to re thinking grading based on mastery of specific skills and concepts rather than broadly written standards Real world examples of teachers struggling with and answering the old questions are included How do we grade fairly and accurately and How do we use grades as an instructional strategy Joseph Staub High School Teacher Downtown Magnets High School CA Most stakeholders agree that report cards aren t enough to show what our students are learning in school but changing the traditional grading system is a task that requires careful planning and challenging discussions Grading for Impact shows educators how to start and plan the discussions that will result in genuine learning experiences for students Ernie Rambo Virtual Learning Community Coordinator Nevada National Board Professional Learning Institute
