Cities Change And Conflict:

Cities, Change, and Conflict Nancy Kleniewski, Alexander R. Thomas, 2019-02-25 *Cities Change and Conflict* was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions found in the human ecology perspective. Although its primary focus is on North American cities, the book contains several chapters on cities in other parts of the world including Europe and developing nations, providing both historical and contemporary accounts on the impact of globalization on urban development. This edition features new coverage of important recent developments affecting urban life, including the implications of racial conflict in Ferguson, Missouri, and elsewhere; recent presidential urban strategies; the new waves of European refugees; the long-term impacts of the Great Recession as seen through the lens of Detroit's bankruptcy; new and emerging inequalities; and an extended look into Sampson's *Great American City: Beyond*, examining the dynamics that shape the form and functionality of cities. The text surveys the experience of urban life among different social groups, including immigrants, African Americans, women, and members of different social classes. It illuminates the workings of the urban economy, local and federal governments, and the criminal justice system, and also addresses policy debates and decisions that affect almost every aspect of urbanization and urban life.

Cities, Change, and Conflict Nancy Kleniewski, 2002. This text discusses the importance of cities for the economic, cultural, and political life of modern societies. The author consistently uses the political economy perspective to introduce students to the basic concepts and research in urban sociology while also acknowledging the contributions of the human ecology perspective. Through the use of case studies, the presentation remains accessible and down to earth. *Cities, Change, and Conflict* Nancy Kleniewski, Alexander R. Seeing Cities Change Jerome Krase, 2016-04-01 Cities have always been dynamic social environments for visual and otherwise symbolic competition between the groups who live and work within them In contemporary urban areas all sorts of diversity are simultaneously increased and concentrated chief amongst them in recent years being the ethnic and racial transformation produced by migration and the gentrification of once socially marginal areas of the city Seeing Cities Change demonstrates the utility of a visual approach and the study of ordinary streetscapes to document and analyze how the built environment reflects the changing cultural and class identities of neighborhood residents Discussing the manner in which these changes relate to issues of local and national identities and multiculturalism it presents studies of various cities on both sides of the Atlantic to show how global forces and the competition between urban residents in contested terrains is changing the faces of cities around the globe Blending together a variety of sources from scholarly and mass media this engaging volume focuses on the importance of seeing and in its consideration of questions of migration ethnicity diversity community identity class and culture will appeal to sociologists anthropologists and geographers with interests in visual methods and urban spaces
