together essays from an array of scholars exploring the troubled relationship between architecture and antidemocratic politics. Comprising detailed case studies throughout the world spanning from the early nineteenth century to the present, *Architecture against Democracy* analyzes crucial occasions when the built environment has been harnessed as an instrument of authoritarian power. Alongside chapters focusing on paradigmatic episodes from twentieth-century German and Italian fascism, the contributors examine historic and contemporary events and subjects that are organized thematically, including the founding of the Smithsonian Institution, Ellis Island infrastructure, the aftermath of the Paris Commune, Cold War West Germany, and Iraq. Frank Lloyd Wright's domestic architecture and Istanbul's Taksim Square. Through the range and depth of these accounts, *Architecture against Democracy* presents a selective overview of antidemocratic processes as they unfold in the built environment throughout Western modernity, offering an architectural history of the recent nationalist international. As new forms of nationalism and authoritarian rule proliferate across the globe, this timely collection offers fresh understandings of the role of architecture in the opposition to democracy.

T&T Clark Handbook of African American Theology, 2019-07-25 This handbook explores the central theme of Christian faith from various disciplinary approaches and different contexts of black experience in the United States. The central unifying theme is freedom, an important concept both in American culture and Christianity. African American theology represents a Christian understanding of God's freedom and the good news of God's call for all humankind to enter life, true human identity, and moral responsibility in genuine and just community. Contributors to the volume argue that African American theology highlights how racism and other intersecting forms of oppression complicate the human predicament and that their eradication requires an expansion of salvation to include the liberation of persons who lack full participation in society and enjoyment of the good and goods made possible by that society. The essays in this handbook employ the tools of biblical criticism, history, cultural and social analysis, religious studies, philosophy, and systematic theology in order to explore and assess the nature and impact of race, ethnicity, gender, sexuality, class, immigration, and cultural and moral pluralism in America, as well as the intersections between African American and African diasporan religious thought and life.
