Civic Education in the Twenty-First Century Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens *Civic Education in the Twenty First Century* brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville s analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today *Civic Education in the Twenty First Century* raises hope that we can have an informed

and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America s educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters

The Future of Civic Education Elizabeth Yeager Washington, Keith C. Barton, 2024-10-01 Speaking to the need to move beyond traditional formulations this textbook presents radical visions for transforming civic education in the United States Drawing on the experience of educators and scholars including those rooted in feminist queer abolitionist global and race conscious perspectives this work offers new practical ideas for civic education reform Responding to recent political crises many scholars educators and public commentators have called for a rebirth of civic education but these all are grounded in the premise that the goal of civic education should be to teach students about the U S Constitutional system and how to operate within it This book argues that the U S governmental system including the Constitution is infused with racist and anti democratic premises and procedures It asks How can we seek a new path one that is more democratic more equitable and more humane A diverse range of leading civic educators who are willing not just to push the boundaries of civic education but to operate outside its assumptions altogether explore what future possibilities for civic education might look like and how these innovative ideas could be implemented in the classroom Combining theory with practice *The Future of Civic Education* will be important reading for those studying or researching in social studies methods social studies issues citizenship and civic education It will also be beneficial to social studies teachers at elementary and secondary levels as well as policymakers and non governmental organizations NGOs

The Future of Democracy Peter Levine, 2015-01-06 We need young people to be civically engaged in order to define and address public problems Their participation is important for democracy for institutions such as schools and for young people themselves who are more likely to succeed in life if they are engaged in

their communities In *The Future of Democracy* Peter Levine scholar and practitioner sounds the alarm in recent years young Americans have become dangerously less engaged They are tolerant patriotic and idealistic and some have invented such novel and impressive forms of civic engagement as blogs boycott movements and transnational youth networks But most lack the skills and opportunities they need to participate in politics or address public problems Levine s timely manifesto clearly explains the causes symptoms and repercussions of this damaging trend and most importantly the means whereby America can confront and reverse it Levine demonstrates how to change young people s civic attitudes skills and knowledge and equally importantly to reform our institutions so that civic engagement is rewarding and effective We must both prepare citizens for politics and improve politics for citizens The Federation Bulletin ,1905 *Leadership, Education, and Training* United States.
