Pherson, 2023 **Critical Thinking and Intelligence Analysis** David T. Moore, 2007 Critical Thinking and Intelligence Analysis David T. Moore, 2006 **Critical Thinking and Intelligence Analysis** David T. Moore, 2007-03 Analysts and analysts alone create intelligence Although technological marvels assist analysts by cataloging and presenting data information and evidence in new ways they do not do analysis To be most effective analysts need an overarching reflective framework to add structured reasoning to sound intuitive thinking Critical thinking provides such a framework and goes further positively influencing the entire intelligence analysis process Analysts who adopt critical thinking stand to improve their analyses This paper defines critical thinking in the context of intelligence analysis explains how it influences the entire intelligence process explores how it toughens the art of intelligence analysis suggests how it may be taught and deduces how analysts can be persuaded to adopt this habit *Strategic Intelligence-Community Security Partnerships* Maiwa'azi Dandaura-Samu, 2017-10-24 This book examines the need to bridge strategic intelligence and community collaboration It explores intelligence collection analysis and operations as they relate to conflicts that can be solved through community collaboration Its argument sits at the nexus of intelligence collection operations and academic research supporting the use of

analytical frameworks process theories critical thinking and pragmatic approaches in intelligence data analysis to provide a seamless end product for effective decision making by policy makers business and military strategists The book insists that public opinion matters in the sense that leaders must shape it using collected intelligence and not wait for things to just happen For any intelligence community collaboration to succeed intelligence agencies must succeed in framing and setting public opinion The book also sheds light on competitive intelligence arguing that turbulent times and threatening environments necessitate that corporate organizations engage in competitive intelligence the same way security organizations and agencies constantly shift and change paradigms They must be innovative create new labor practices and use self motivating management approaches and dynamic imaginative models to invent new strategic intelligence tactics and resolutions for optimal performance and productivity
