Cro Magnon How The Ice Age Gave Birth To The First Modern Humans:

Cro-Magnon Brian Fagan,2011-05-17 Cro Magnons were the first fully modern Europeans not only the creators of the stunning cave paintings at Lascaux and elsewhere but the most adaptable and technologically inventive people that had yet lived on earth The prolonged encounter between the Cro Magnons and the archaic Neanderthals between 45 000 and 30 000 years ago was one of the defining moments of history The Neanderthals survived for some 15 000 years in the face of the newcomers but were finally pushed aside by the Cro Magnons vastly superior intellectual abilities and cutting edge technologies What do we know about this remarkable takeover Who were these first modern Europeans and what were they like How did they manage to thrive in such an extreme environment And what legacy did they leave behind them after the cold millennia This is the story of a little known yet seminal chapter of human experience From publisher description

Shea,2023-03-23 In *The Unstoppable Human Species* John Shea explains how the earliest humans achieved mastery over all but the most severe biosphere level extinction threats He explores how and why we humans owe our survival skills to our global geographic range a diaspora that was achieved during prehistoric times By developing and integrating a suite of Ancestral Survival Skills humans overcame survival challenges better than other hominins and settled in previously unoccupied habitats But how did they do it How did early humans endure long enough to become our ancestors Shea places how did they survive questions front and center in prehistory Using an explicitly scientific comparative and hypothesis testing approach *The Unstoppable Human Species* critically examines much archaeological mythology about prehistoric humans Written in clear and engaging language Shea s volume offers an

The Attacking Ocean Brian Fagan, 2013-06-11 The past fifteen thousand years the entire span of human civilization have witnessed dramatic sea level changes which began with rapid global warming at the end of the Ice Age when coastlines were more than seven hundred feet below modern levels Over the next ten millennia the oceans climbed in fits and starts These rapid changes had little effect on those humans who experienced them partly because there were so few people on earth and also because those people were able to adjust readily to new coastlines Global sea levels stabilized about six thousand years ago except for local adjustments that caused often significant changes to places such as the Nile Delta The curve of inexorably rising seas flattened out as urban

civilizations developed in Egypt Mesopotamia and South Asia The earth s population boomed quintupling from the time of Christ to the Industrial Revolution The threat from the oceans increased with our crowding along shores to live fish and trade Since 1860 the world has warmed significantly and the ocean s climb has accelerated The sea level changes are cumulative and gradual no one knows when they will end The Attacking Ocean from celebrated author Brian Fagan tells a tale of the rising complexity of the relationship between humans and the sea at their doorsteps a complexity created not by the oceans which have changed little What has changed is us and the number of us on earth
