Crossing The Next Meridian Land Water And The Future Of The West:

Crossing the Next Meridian Charles F. Wilkinson, 1993-06-01 In *Crossing the Next Meridian* Charles F. Wilkinson an expert on federal public lands Native American issues and the West's arcane water laws explains some of the core problems facing the American West now and in the years to come He examines the outmoded ideas that pervade land use and resource allocation and argues that significant reform of Western law is needed to combat desertification and environmental decline and to heal splintered communities Interweaving legal history with examples of present day consequences of the laws both intended and unintended Wilkinson traces the origins and development of the laws and regulations that govern mining ranching forestry and water use He relates stories of Westerners who face these issues on a day to day basis and discusses what can and should be done to bring government policies in line with the reality of twentieth century American life
