Crouching Tiger What Chinas Militarism Means For The World:

Crouching Tiger Peter Navarro, 2015-11-03 Will there be war with China This book provides the most complete and accurate assessment of the probability of conflict between the United States and the rising Asian superpower Equally important it lays out an in depth analysis of the possible pathways to peace Written like a geopolitical detective story the narrative encourages reader interaction by starting each chapter with an intriguing question that often challenges conventional wisdom Based on interviews with more than thirty top experts the author highlights a number of disturbing facts about China s recent military buildup and the shifting balance of power in Asia the Chinese are deploying game changing carrier killer ballistic missiles some of America s supposed allies in Europe and Asia are selling highly lethal weapons systems to China in a perverse twist on globalization and on the U S side debilitating cutbacks in the military budget send a message to the world that America is not serious about its pivot to Asia In the face of these threatening developments the book stresses the importance of maintaining US military strength and preparedness and strengthening alliances while warning against a complacent optimism that relies on economic engagement negotiations and nuclear deterrence to ensure peace Accessible to readers from all walks of life this multidisciplinary work blends geopolitics economics history international relations military doctrine and political science to provide a better understanding of one of the most vexing problems facing the world *China: From Poverty to World Power* Paolo Urio, 2024-10-19 The second edition of this book updated to February 24 2024 presents a comprehensive evaluation of the strategy implemented by China to manage its modernization process The author evaluates to what extent the economy has been developed whether the imbalances due to the priority given to economic development have been corrected and whether the improvements of science and technology have allowed China to develop world class high tech sectors and a modern defence Clearly the end of the XX Century saw the fulfilment of Zhou En Lai four modernizations i e the acquisition of power resources that fulfilled Mao s proud 1949 statement we stood up thereby projecting China into the international arena as a re emerging world power The author insists on the fundamental difference between American and Chinese ideologies as the main drivers of their foreign policy i e the extreme rigidity of the former compared to the remarkable flexibility and adaptability of the latter He further explains the consequences of the increasingly aggressive American foreign policy i e the US pretence to act as the leader of the existential struggle between democracy and dictatorship This posture reached its apex during the Ukrainian and the Middle East crises that unveiled the irreversible decline of the West and have become two formidable accelerators of the transition from the unipolar world America made to the multipolar world promoted by China Russia and the BRICS **The Palgrave Handbook of Contemporary Geopolitics** Zak Cope, 2024-11-01 The Palgrave Handbook of Contemporary Geopolitics features expert geopolitical analysis from internationally renowned experts in the field Reflecting the need for global analysis of national and regional politics The Handbook highlights the wider strategic economic cultural and security

geography of contemporary international relations The contributions underscore the complex interplay between sociopolitical processes at the national level and their articulation at the regional and global levels The Impact of China's Belt and Road Initiative Jeremy Garlick, 2019-11-15 This book merges macro and micro level analysis of the Belt and Road Initiative BRI to dissect China's aim in creating an integrated Eurasian continent through this single mega project BRI has been the source of much interest and confusion as established frameworks of analysis seek to understand China's intentions behind the policy China's international activity in the early 21st century has not yet been successfully theorised by IR scholars because of a failure to satisfactorily encompass its complexity In addition the mix and match syncretism of the Chinese approach to foreign policy has been under emphasised or omitted in many analyses Bringing together complexity thinking and analytic eclecticism to assess the degree to which this scheme can transform international relations Garlick critically examines this large scale interconnectivity project and its potential impacts The book will be of interest to scholars and practitioners in the field of international relations and China studies including academics policy makers and diplomats around the world America and the China Threat Paolo Uriò, 2020-01-01 The US has historically disguised to itself and to others the true nature of its relations with those nations that stood in the way of its ambitions Reversing the order of cause and effect it has projected fear of harm from other nations even as it was expanding its dominion over them With the collapse of the Soviet Union which was so to be feared that the American people could even be told they would be better dead than Red the US rejoiced in the belief that the world was at last under its uncontested leadership celebrating Francis Fukuyama's then acclaimed book *The End of History* and proclaiming perhaps even believing that it alone can assure peace stability and prosperity in the international system However at the beginning of the 21st century a formidable new competitor emerged China Now we hear the fear stoked mantra The Chinese are coming But is China really a threat to the US or just to its sole superpower status This book debunks among many others the myth of the universality of US values and the myth of the imperial dictatorial and state capitalist character of today's China It explains the division between the US and China through an historical analysis of their ideologies It reveals the source of the extraordinary difficulty the US faces in adapting to the changes occurring in the international system inter alia the firm belief in its exceptionalism and good intentions By contrast the Chinese ideology while also possessing a remarkable internal coherence through time has achieved greater flexibility by integrating values imported from the West and several Confucian values to form a new ideology better able to adapt its public policies to changes in the national and the international environments China's significant military and economic advances are addressed along with its new investments and One Belt One Road Initiative **China's New Sources of Economic Growth: Vol. 2** Ligang Song, Ross Garnaut, Cai Fang, Lauren Johnston, 2017-07-20 China's efforts in searching for new sources of growth are increasingly pressing given the persistence of the growth slowdown in recent years This year's book elucidates key present macroeconomic challenges facing China's economy in 2017 and the impacts and readiness of

human capital innovation and technological change in affecting the development of China's economy. The book explores the development of human capital as the foundations of China's push into more advanced growth frontiers. It also explores the progress of productivity improvement in becoming the primary mechanism by which China can sustain economic growth and explains the importance of China's human capital investments to success on this front. The book demonstrates that technical change is a major contributor to productivity growth and that invention and innovation are increasingly driving technical change but so far lumpily across regions, sectors, and invention motivations. Included are chapters providing an update on reform and macroeconomic development, educational inequality, the role of intangibles in determining China's economic growth, and China's progress in transitioning towards being an innovative country. The book also covers the regional dimension of innovation and technological progress by sector in agricultural productivity, renewable energy, and financial markets. Chapters on trade, investment, regional cooperation, and foreign aid explore further the mechanisms through which technological change and innovative activities are emerging locally and internationally.

China Reclaims World Power Status Paolo Uriò, 2018-04-09 Using both Chinese and Western theoretical approaches, this book analyses the strategies implemented by China for reclaiming power in the international domain. Examining domestic measures taken by China to assure its economic and social development, it also considers the strengths and weaknesses of its major international opponent, the US, and analyses their competing approaches to developing power resources and leadership dominance. It studies the foreign policies of both China and the US, first by going back to the historical origins of their ideological foundations and secondly by analysing their power building from the nineteenth century to the Trump and Xi Jinping presidencies. Finally, this book focuses on the One Belt One Road Initiative as China's response to putting an end to the world America made and debates the question of whether China will emerge as a new capitalist country embedded in the liberal capitalist world system or as an authoritarian state with a socialist market economy able to change the rules of the international order. Providing a comparison of the two major world powers and a comprehensive overview of their relationship, this book will be of great interest to students and scholars of Chinese politics and international relations, as well as Chinese Studies more generally.

The Future of China's Past Albert Welter, 2023-01-01 The Future of China's Past examines how China's traditional culture is being reinvented and manipulated for political purposes. Like no time before, in its recent history, and certainly at no time in the history of the People's Republic of China, is being shaped in terms of its past, but which past? Confucianism, Legalism, Daoism, Buddhism, or combination of pasts is being held up as the model. Given its growing economic, political, and cultural significance, it is incumbent upon us to take China's rise seriously, yet perspectives involving modern and contemporary geopolitical and intrastate dynamics are insufficient on their own for understanding China's rise, and the same holds true for economic analyses, however pertinent. Instead, this book looks at current engagements with models of China's past, introducing the four traditional lenses of Chinese thought and reflecting on their potential relevance.

for China's and the world's future **World Leadership In The Balance: China And The Us Clash For Supremacy**

Pierre-antoine Donnet, 2021-05-19 China and the United States have entered a multifaceted cold war trade high tech space defense environment and values as they jostle for influence throughout the world This rivalry between the world's top two economic powers will likely dominate the decades to come and its outcome is uncertain After the American century this new century may indeed be China's or it may not With Joe Biden's election as president of the United States we are certainly in for a change of leadership style But in terms of substance US policy towards China is likely to remain tough How will Beijing react What strengths and weaknesses does China have in this long struggle for supremacy against the United States This book analyzes the different aspects of this disconcerting rivalry that has had and will continue to have an impact on our daily lives The coronavirus pandemic has further exposed the failings of a monolithic Chinese system that does not tolerate freedom of expression but it has also paradoxically placed China in a position of strength against the United States

Examining the South China Sea Disputes Murray Hiebert, 2015-11-13 The Center for Strategic and International Studies CSIS hosted its fifth annual South China Sea conference in July 2015 This compilation features papers from some of the top experts in the United States and Asia who presented during the day's panels Bill Hayton Bonnie Glaser and Wu Shicun discuss recent developments in the South China Sea Pham Lan Dung and Tran Huu Duy Minh explore legal issues surrounding the disputes and Ian Storey Patrick Cronin Renato Cruz de Castro and Peter Jennings examine various aspects of the military balance and regional order
