Nevertheless, there was nothing to do at that time and therefore, we started to discuss the interest of all these various countries, beginning with China, which, without doubt, seemed to be the most important country. But there were many countries with whom we had contacts and which had to be paid for their valuable contributions, and therefore, that which had to be done was to find a way to make sure that the various countries, which were making contributions, had the right to be paid for their contributions. This, however, was not a simple matter, since the idea of the "Five Big Powers" was not a simple matter, but it was a very important one.

These findings are also supported by studies that found that individuals with a history of substance use disorder are more likely to use substances than those without a history of substance use disorder. This is likely due to the fact that individuals with a history of substance use disorder are more likely to have developed tolerance to the effects of the substance, which can lead to increased use.
