Developing Translation Competence Benjamins Translation Library:

Developing Translation Competence Christina Schäffner, Beverly Adab, 2000-10-15 This volume presents a comprehensive study of what constitutes Translation Competence from the various sub competences to the overall skill Contributors combine experience as translation scholars with their experience as teachers of translation The volume is organized into three sections Defining Building and Assessing Translation Competence The chapters offer insights into the nature of translation competence and its place in the translation training programme in an academic environment and show how theoretical considerations have contributed to defining building and assessing translation competence offering practical examples of how this can be achieved The first section introduces major sub competences including linguistic cultural textual subject research and transfer competence The second section presents issues relating to course design methodology and teaching practice The third section reflects on criteria for quality assessment *Translation Competence* Carla

Quinci, 2023-02-23 This book offers a systematic and comprehensive account of translation competence TC reflecting on its different models and conceptualisations throughout its development and outlining future directions for both theory and practice The volume charts the evolution of TC in line with related findings in empirical product and process oriented research In critically examining the different models of translation competence Quinci explores a wide range of connected issues of ongoing debate within Translation Studies including translation quality the revision process and translator self assessment The second section of the book investigates these themes at work in the design conduct and results of an award winning longitudinal research project which analysed the acquisition and development of TC in a sample group of translation trainees and professional translators The volume builds on the outcomes of this project to offer practical activities for translator education informed by theory and empirical research toward encouraging continued reflection and new directions for translation competence research and practice This book will be of interest to scholars in Translation Studies as well as translation trainees and active translation professionals *The Role of Discourse Analysis for Translation and in Translator Training* Christina Schäffner, 2002-01-01 It has been widely recognised that an in depth textual analysis of a source text is relevant for translation This book discusses the role of Discourse Analysis for translation and translator training One particular model of discourse analysis is presented in detail and its application in the context of translator training is critically examined Telecollaboration in Translator Education Mariusz Marczak, 2023-11-24 This volume provides a comprehensive treatment of telecollaboration as a learning mode in translator education surveying the state of the art exploring its distinctive challenges and affordances and outlining future directions in both theoretical and practical terms The book begins with an overview of telecollaboration and its rise in prominence in today s globalised world one in which developments in technology have significantly impacted practices in professional translation and translator education The volume highlights basic design types and assessment modes and their use in achieving competence based learning outcomes

drawing on examples from seven telecollaboration projects In incorporating real life research Marczak draws readers attention to not only the practical workings of different types of projects and their attendant challenges but also the opportunities for educators to diversify and optimize their instructional practices and for budding translators to build competence and better secure their future employability in the language service provision industry This volume will be a valuable resource for students and researchers in translation studies particularly those with an interest in translator education and translation technology as well as stakeholders in the professional translation industry New Frontiers in Forensic Linguistics Monwabisi Ralarala, Russell Kaschula, Georgina Heydon, 2019-06-25 The field of forensic linguistics is a niche area that has not enjoyed much participation from the African continent The theme of language and the law in this book is one that straddles two important aspects of the legal history of South Africa in particular and how it has impacted on the country s legal and education systems The declaration by the United Nations of 2019 as The International Year of Indigenous Languages is opportune not only for the launch of this book but for what its research content tells us of the strides taken in ensuring access to justice for all citizens of the world in a language they understand The contributions by authors in this book tell the story of many African citizens and those hailing from beyond our borders who straddle the challenges of linguistic and legal pluralism in courtrooms across their respective countries It is our hope that the contributions made in this book will assist in ensuring human rights become a reality for global citizens where indigenous voices have not been heard and that these citizens will be free to give their testimonies in a language of their choice and that they may be heard and understood **A Translation Theory of Knowledge Transfer** Kjell Arne Røvik, 2023 This book develops a new theory about the challenges of transferring and sharing knowledge across organizational borders Knowledge transfer refers to processes through which actors and organizational units exchange receive and are influenced by the experience and knowledge of others and can manifest itself through changes in the knowledge bases and performance of recipients The capacity of an organization to transfer and exploit knowledge from other organizations is a key to its competitiveness progress and survival Thus imitation is an important prerequisite for innovation However effective knowledge transfer is incredibly challenging it sometimes succeeds but it frequently fails Over the last 30 years considerable research efforts have been made to identify the factors that account for the variations in outcomes of knowledge transfer processes Chapter 2 of this book contains a comprehensive review of transfer theories and research findings However despite great research efforts and many new insights much of the variation in knowledge transfer processes and outcomes remains unexplained which calls for a re theorizing of the subject This book offers a new and fresh reframing of knowledge transfer across organizational borders Based on extensive research it outlines a new theory that conceptualizes knowledge transfer between organizations as acts of translation resembling the translation of language and texts The author shows how involved actors translation competence is a key to better understanding variations in knowledge transfer processes and

outcomes Thus this new reframing both extends and challenges established theories of knowledge transfer Professions and Proficiency Johannes Glückler,Christopher Winch,Anna Mateja Punstein,2023-03-16 This open access book takes an original view on the social production of knowledge in and across space It explores how people build and transfer proficiency within and beyond the bounds of social groups Social groups such as professions epistemic communities or academic disciplines collectively organize to help individuals gain understanding of and knowledge about specific subjects of expertise Yet at the same time they frame legitimate ways of thinking and learning and they sanction other ways of knowing that are collectively seen as false inelegant or inappropriate etc Acknowledging the interdependency between proficiency and professions the interdisciplinary contributions to this volume focus on three aspects Part I looks into the social processes of professions and what actually makes qualifications competence and proficiency Part II elaborates on the dynamics that transform intangible knowledge by exploring for instance the legitimacy of scientists within society Part III gives insights into how space influences the development of professional work for instance by reconstructing the historical formation of the psychology profession in Argentina This volume provides a valuable read for scholars students and professionals in the fields of innovation knowledge creation and governance **Theory of Mind in Translation** Annegret Sturm,2020-06-12 Taking the perspective of others is central to translation But does translation train this uniquely human capacity This book introduces the concept of Theory of Mind ToM to model one of the central features of translation the meta representation of others and presents three innovative studies which investigate the question using brain scans eye tracking and key logging to shed new light on the role of non linguistic macro competences on the translation process *Transcending Boundaries in the Digital Age* Steven Kwan Keung Ng,Tiffany Shurui Bai,Noble Po Kan Lo,Anna Wing Bo Tso,Wendy Wing Lam Chan,2025-07-24 This book addresses the topic of educational communications and technology in the digital age with a comprehensive and forward looking approach It explores innovative hybrid and online learning models examines issues of equity and inclusion in digital education investigates the integration of emerging technologies and artificial intelligence and delves into the evolving landscape of assessment collaboration and skill development in digital environments It presents cutting edge research case studies and strategies for optimizing the use of technology in teaching learning and assessment while also addressing the ethical and societal implications of these advancements to ensure a focus on empowering learners and promoting inclusivity This book provides a roadmap for the future of education in the digital age offering valuable insights and practical solutions for educators researchers and policymakers alike **On Translating French Literature and Film II** ,2021-07-19
