The Palgrave Encyclopedia of Urban and Regional Futures Robert C. Brears, 2023-01-13 While urban settlements are the drivers of the global economy and centres of learning culture and innovation and nations rely on competitive dynamic regions for their economic social and environmental objectives urban centres and regions face a myriad of challenges that impact the ways in which people live and work create wealth and interact and connect with places Rapid urbanisation is resulting in urban sprawl rising emissions urban poverty and high unemployment rates housing affordability issues lack of urban investment low urban financial and governance capacities rising inequality and urban crimes environmental degradation increasing vulnerability to natural disasters and so forth At the regional level low employment

low wage growth scarce financial resources climate change waste and pollution and rising urban peri urban competition etc are impacting the ability of regions to meet socio economic development goals while protecting biodiversity The response to these challenges has typically been the application of inadequate or piecemeal solutions often as a result of fragmented decision making and competing priorities with numerous economic environmental and social consequences In response there is a growing movement towards viewing cities and regions as complex and sociotechnical in nature with people and communities interacting with one another and with objects such as roads buildings transport links etc within a range of urban and regional settings or contexts This comprehensive MRW will provide readers with expert interdisciplinary knowledge on how urban centres and regions in locations of varying climates lifestyles income levels and stages development are creating synergies and reducing trade offs in the development of resilient resource efficient environmentally friendly liveable socially equitable integrated and technology enabled centres and regions

Understanding Urban Cycling Justin Spinney, 2020-10-28 Academic interest in cycling has burgeoned in recent years with significant literature relating to the health and environmental benefits of cycling the necessity for cycle specific infrastructure and the embodied experiences of cycling Based upon primary research in a variety of contexts such as London Shanghai and Taipei this book demonstrates that recent developments in urban cycling policy and practice are closely linked to broader processes of capital accumulation It argues that cycling is increasingly caught up in discourses around smart cities that emphasise technological solutions to environmental problems and neoliberal ideas on individual responsibility and bio political conduct which only results in solutions that prioritise those who are already mobile Accordingly the central argument of the book is not that the popularisation of cycling is inherently bad but that the manner in which cycling is being popularised gives cause for social and environmental concern Ultimately the book argues that cycling has now become a vehicle for sustaining pro growth agendas rather than subverting them or shifting to sustainable no growth de growth and less technologically driven visions of modernity This book makes an innovative contribution to the fields of Cycling Studies Mobilities and Transport and will be of interest to students and academics working in Human Geography Transport Studies Urban Studies Urban Planning Public Policy Sociology and Sustainability

Towards Transport Net Zero Jon Shaw, Stephen Ison, Maria Attard, 2025-09-22 Towards Transport Net Zero provides a go to source of information for policymakers businesses scholars and students alike Contributors discuss the nature and scale of the issues associated with moving towards net zero transport along with the opportunities for positive and transformational change

Smart Energy for Smart Transport Eftihia G. Nathanail, Nikolaos Gavanis, Giannis Adamos, 2023-03-10 This book reports on original research and practical findings fostering sustainable and smart urban mobility transformation Gathering contributions presented at the 6th Conference on Sustainable Urban Mobility held from August 31 to September 2 2022 on Skiathos Island Greece it covers topics relating to electric and clean energy intelligent technologies and automation green travel modes and transport safety It highlights solutions for inclusive

transportation sustainable and resilient supply chains and describes novel strategies for urban planning and innovative transport infrastructure This book offers extensive information to academicians researchers practitioners and decision makers working on effective strategies to transform urban mobility in a sustainable and equitable way
