Dying John F. Szabo, 2009-11-02 While it can be traced to the 1700s the term thanatology has gained traction in recent decades to refer to the study of death. Because of the breadth of the published material and the challenges of discovery in large bibliographic databases and catalogs finding and identifying monographic material on death, dying, grief, and bereavement can be extremely challenging. Although there have been several bibliographical resources published on thanatology, those titles were incomplete, limited in scope, or leaned heavily toward one area of the field. In *Death and Dying: An Annotated Bibliography of the Thanatological Literature*, John F. Szabo provides more than 2,200 citations of monographs on the science and study of death and dying. Among the areas this volume addresses are the psychological, philosophical, and attitudinal aspects of coping and dealing with the burdens of caregiving and working in the helping professions; instructional and educational topics for practitioners, primarily health care providers; cultural differences in bereavement, rituals, and grief; mourning and loss. In addition, notable titles on or relating to death and dying in popular culture, death themes in literature, methods of death, or specific ethical policy or public issues are also included when they contribute important information to subject areas on which the book focuses. This book will be helpful to students, researchers, academics, caregivers, health care professionals, psychologists, social workers, and anyone with an interest in death, dying, bereavement, or the care of the terminally ill.

Medieval Death Paul Binski, 1996 In this richly illustrated volume, Paul Binski provides an absorbing account of the social, theological, and cultural issues involved in death and dying in Europe from the end of the Roman Empire to the early sixteenth century. He draws on textual, archaeological, and art historical sources to examine pagan and Christian attitudes toward the dead, the aesthetics of death, and the body, burial ritual, and mortuary practice. Illustrated throughout with fascinating and sometimes disturbing images, Binski's account weaves together close readings of a variety of medieval thinkers. He discusses the impact of the Black Death on late medieval art and examines the development of the medieval tomb, showing the changing attitudes toward the commemoration of the dead between late antiquity and the late Middle Ages. In one chapter, Binski analyzes macabre themes in art and literature, including the Dance of Death, which reflect the medieval obsession with notions of humility, penitence, and the dangers of bodily corruption. In another, he studies the progress of the soul after death through the powerful descriptions of Heaven, Hell, and Purgatory in Dante and other writers, and through portrayals of the Last Judgment and the Apocalypse in sculpture and large-scale painting.

Mephistopheles Jeffrey Burton Russell, 1990 An excellent and important intellectual history. *Library Journal* Using examples from theology, philosophy, art, literature, and popular culture, Russell describes the great changes effected in our idea of the Devil by the intellectual and cultural developments of modern times. *Mephistopheles* is the fourth and final volume of Jeffrey Burton Russell's critically acclaimed history of the concept of the Devil. The series constitutes the most complete historical study ever made of the figure called the second most famous personage in Christianity. In the first three volumes, the author brought the history of Christian diabolology to the end of the Middle Ages. This volume continues the story from the Reformation to the present.
