CENTRAL ASIA'S SHRINKING CONNECTIVITY GAP: IMPLICATIONS FOR U.S. STRATEGY. Roman Muzalevsky, 2022

Central Asia's Shrinking Connectivity Gap, 2014 The United States is witnessing a transformation of Central Asia a critical yet highly understudied and misunderstood area of the world which is seeing growing influence of China India and Russia The agendas of these actors as well as the United States Japan the EU Turkey and Iran among others have enabled Central and South Asian countries to shrink their connectivity gaps dramatically in the last 2 decades aiding the U S grand strategy of advancing global connectivity However they could also potentially undermine a multidirectional connectivity and limit development choices for the Central Asian states generating challenges and opportunities for the United States whose global influence is receding The U S future global and regional role and capabilities will depend on how well Washington adjusts its grand strategy in response to current and projected economic and geopolitical trends in the era of rising powers As the United States calibrates its ends and means its assessment of the importance of Central and South Asia for its strategy will in large part hinge on security trends unfolding in Afghanistan and Pakistan Whether Central Asia will become a major pillar of the U S grand strategy given the rise of China and India and the resurgence of Russia remains unclear But its goals of supporting sovereignty democratization and inter regional links in Central and South Asia offer some hope that Washington will continue to support the region's global connectivity preferably by pursuing an engaged long term and substantive regional strategy Publisher's web site [Central Asia's Shrinking Connectivity Gap: Implications for U. S. Strategy](#) Strategic Studies Institute, U. S. Army War College Press, 2014-12-16 Once sealed off from the rest of the world during the Soviet times the states of Central Asia today are rapidly integrating with the global economy The opening up of China in the 1980s the demise of the Soviet Union a decade later and the ongoing globalization have all served as grand forces facilitating this highly monumental development The U S regional military involvement after September 11 2001 and engagement by other actors have further enabled these countries to reconnect with the world this time as sovereign units Today more than 2 decades after they gained their independence the Central Asian countries along with the rest of the world face a great challenge and an opportunity the rise of China India and resurgence of Russia These neighboring powers are investing and facilitating internal and external links of the region and profoundly shaping the region's external connectivity at the very time as the United States withdraws its troops from Afghanistan and sees a relative decline in its global and regional power and influence *China's Economic Statecraft: Co-optation, Cooperation And Coercion* Mingjiang Li, 2017-03-16 This book aims to study China's economic statecraft in the contemporary era in a comprehensive manner It attempts to explore China's approaches to using its economic trade investment and financial power for the pursuit of its political security and strategic interests at the regional and global levels The volume addresses three major issue areas in particular The first issue pertains to how Beijing has used its economic clout to protect what it perceives

as its core interests in its external relations Three cases are included the Taiwan issue human rights and territorial dispute in the South China Sea The second major area of inquiry focuses on how China has employed its economic power in its key bilateral relations including relations with Japan North Korea the United States and other states in the East Asian region The third issue concerns China's economic statecraft in the global context It addresses the impacts of China's economic power and policy on the transformation of the global financial structure developments in Africa the international intellectual property rights regime and China's food security relations with the outside world

Afghanistan and Its Neighbors after the NATO Withdrawal Kirill Nourzhanov, Amin Saikal, 2016-03-04 The planned reductions in NATO troop numbers in Afghanistan through 2015 and a final withdrawal at the end of 2016 brings up numerous pressing questions about the security and national interests of not just Afghanistan but of the broader region itself The problem of a chaotic Afghanistan or of an outright Taliban victory is of great concern to not only immediate neighbors such as Iran Pakistan and the former Soviet Central Asian republics to the north but also to those countries in the region with Afghanistan related security or economic concerns such as China and India Further abroad Russian American and European interests and plans for dealing with the fallout from Afghanistan must also be taken into account as these major powers have enduring interests in Afghanistan and the region This volume puts the prospects for short and mid term security dynamics at the core of the analysis with each case being placed in its proper contemporary historical economic and political context The book will offer a truly comprehensive nuanced and timely account of the security situation in and around Afghanistan

China, The United States, and the Future of Central Asia David Denoon, 2015-07-10 The first of a three volume series on the interaction of the US and China in different regions of the world China the United States and the Future of Central Asia explores the delicate balance of competing foreign interests in this resource rich and politically tumultuous region Editor David Denoon and his internationally renowned set of contributors assess the different objectives and strategies the U S and China deploy in the region and examine how the two world powers are indirectly competitive with one another for influence in Central Asia While the US is focused on maintaining and supporting its military forces in neighboring states China has its sights on procuring natural resources for its fast growing economy and preventing the expansion of fundamentalist Islam inside its borders This book covers important issues such as the creation of international gas pipelines the challenges of building crucial transcontinental roadways that must pass through countries facing insurgencies the efforts of the US and China to encourage and provide better security in the region and how the Central Asian countries themselves view their role in international politics and the global economy The book also covers key outside powers with influence in the region Russia with its historical ties to the many Central Asian countries that used to belong to the USSR is perhaps the biggest international presence in the area and other countries on the region's periphery like Iran Turkey Pakistan and India have a stake in the fortunes and future of Central Asia as well A comprehensive original and up to date collection this book is a wide ranging

look from noted scholars at a vital part of the world which is likely to receive more attention and face greater instability as NATO forces withdraw from Afghanistan

The Russia-Ukraine War and Its Implications on Central Asia Assylzat Karabayeva, Ikboljon Qoraboyev, 2024-10-15

The Russia Ukraine War and its Implications for Central Asia Resilience Connectivity and Decolonization embarks on a comprehensive exploration of the profound impacts of the Ukraine conflict on Central Asia viewed through the prism of the region's scholars. This book assesses the geopolitical transformation, economic shifts, and the evolving narratives of national and regional identities underpinned by thirty years of nation building and current socio-economic realities. This collection critically navigates between the dual forces of emerging expectations for change, decolonization, and the strong undercurrents of path dependence and local socio-economic constraints. Furthermore, it provides a nuanced examination of the intricate relationships between state, society, and media, illustrating how these dynamics are reshaped in the face of the war's ongoing impact. Through a balanced perspective, this volume unveils an emerging vision of Central Asia marked by resilience and a strategic quest for a more pronounced role in global affairs. This work stands as a crucial resource for understanding the multifaceted consequences of the Ukraine-Russia conflict on Central Asia, enriched by authentic regional voices.

Routledge Handbook on South Asian Foreign Policy Aparna Pande, 2021-08-30

This handbook offers a comprehensive overview of South Asian foreign policy, examining the complex history and present state of South Asian foreign policy, the foreign policy of the countries of the region, as well as their relationships with their neighbors and key external players such as China and the United States, in an effort to understand South Asia's place in the world order. It illustrates the future trajectory of foreign policy in the region and analyses the future of regional arrangements like SAARC (South Asian Association for Regional Cooperation) and BIMSTEC. The handbook is structured in five parts, each representing a focused area of enquiry: Foreign Policy Relations within South Asia, Relations within Indo-Pacific, Relations with China, Europe, and the United States, Security, and a carefully selected collection of 26 chapters written by experts on South Asian foreign, economic, and security policy. This handbook provides an objective yet accessible overview of the history and current state of foreign policy of each country and the region. It is an authoritative reference work for academics and students, as well as international think tanks, research institutes, and non-governmental organizations working on South Asian Politics, Asian Politics, Foreign Politics, International Affairs, World History, and International Relations.

Energy Security and the Indian Ocean Region Dennis Rumley, Sanjay Chaturvedi, 2015-07-24

First published in 2005, this book is the second volume produced by the Indian Ocean Research Group (IORG). The Indian Ocean Region has become increasingly important to discussions on energy security, not only because of the critical importance of regional states as energy suppliers but also because of the essential role of the Ocean as an energy route. The main purpose of this volume is to provide an elaborate and critical evaluation of some of these issues and their implications for regions outside the Indian Ocean.
