Metal Matrix Composites Hamid Mostaghaci,2013-10-22 Emphasis is on the discussion and analysis of the processing and

properties of multiphase structural ceramic materials and metal matrix composites reinforced with ceramic particulates or fibers This volume represents the state of the art in our understanding of the processing structure property interrelationships for these materials which possess unique and useful mechanical and thermal properties as a result of their multiphase nature Additionally the reader will find useful information on many new materials and processes currently under investigation

Handbook of Ceramic Composites Narottam P. Bansal, 2006-08-25 Ceramic matrix composites CMCs are at the forefront of advanced materials technology because of their light weight high strength and toughness high temperature capabilities and graceful failure under loading During the last 25 years tremendous progress has been made in the development and advancement of CMCs under various research programs funded by the U S Government agencies National Aeronautics and Space Administration NASA Department of Defense DoD and Department of Energy DOE Ceramic composites are considered as enabling technology for advanced aeropropulsion space propulsion space power aerospace vehicles and space structures CMCs would also find applications in advanced aerojet engines stationary gas turbines for electrical power generation heat exchangers hot gas filters radiant burners heat treatment and materials growth furnaces nuclear fusion reactors automobiles biological implants etc Other applications of CMCs are as machinery wear parts cutting and forming tools valve seals high precision ball bearings for corrosive environments and plungers for chemical pumps Potential applications of various ceramic composites are described in individual chapters of the present handbook Handbook of Ceramic Composites is different from the other books available on this topic Here a ceramic composite system or a class of composites has been covered in a separate chapter presenting a detailed description of processing properties and applications Each chapter is written by internationally renowned researchers in the field The handbook is organized into five sections Ceramic Fibers Non oxide Non oxide Composites Non oxide Oxide Composites Oxide Oxide Composites and Glass and Glass Ceramic Composites This handbook should be a valuable source of information for scientists engineers and technicians working in the field of CMCs and also for designers to design parts and components for advanced engines and various other industrial applications

Developments in Advanced Ceramics and Composites Manuel E. Brito, Peter Filip, Charles A. Lewinsohn, Ali Sayir, Mark Opeka, William M. Mullins, 2009-09-29 Over 40 papers are included in this volume from six symposia held during the 29th International Conference on Advanced Ceramics and Composites Topics include ceramics and environmental applications characterization tools for materials in extreme environments functional nanomaterials biomimetrics carbon carbon and ceramic composite materials in friction multifunctional materials systems and reliability
