Cargill Going Global:

Cargill Wayne G. Broehl, 1998 A corporate history that also illuminates a difficult and significant period in U S history

The World for Sale Javier Blas, Jack Farchy, 2021-03-01 The World for Sale tells the story of the modern day commodity traders largely unknown to the public Commodity traders are the last swashbucklers of global capitalism willing to do businesses where other companies don't dare set foot thriving through a mixture of ruthlessness and personal charm and often shaping global politics from Cuba to Iraq and from Russia to Libya Benefiting from three decades of reporting from nearly 100 countries including tens of thousands of pages of previously unpublished financial and legal documents and interviews with more than one hundred former and current executives the book sheds unprecedented light onto an industry that has long operated in the shadows

A History of the Global Wheat Trade Marco Bertilorenzi, Carlo Fumian, Giovanni Gozzini, 2025-04-29 During the second half of the 19th century a new global market for wheat came to the fore Ever since scarce and perishable food has been transformed into a modern global commodity millions of tons of which is sold bought and transported across the oceans providing the daily bread for a fast growing world population This book explores the historical origin of the global wheat market offering an actor centred view of the history of this new global commodity The contributions to this volume demonstrate that the development of the global wheat trade through the late 19th and early 20th centuries has not only impacted the world food regime it also led to the dissemination of new economic institutions Countless technological innovations such as elevators or telegraphic lines have paved the way to the creation of new financial tools for trade such as futures and grain exchanges which transformed the market The book also examines new global actors such as Cargill Louis Dreyfus or Bunge y Born who took advantage of the new opportunities provided by the interlinked and globalized world grain trade For the first time in history the price of a single commodity which was crucial for human life ended up being decided in the areas of production by the producers and started to be fixed further afield in specific and anonymous trading places The book will be of great interest to historians of economics business trade agriculture globalization and commodities

Creating Global Capitalism Espen Storli, Marten Boon, 2024-10-04 This book provides a unique insight into the world of commodity trading companies often depicted as the hidden companies of the global economy and showcases how they were instrumental in bringing about the economic integration of new commodities and far flung regions into the first global economy in the late nineteenth and early twentieth century The late nineteenth century witnessed an unprecedented phase of global economic integration As organisers of global trade trading companies specialising in commodities were instrumental in creating this first global economy From soybeans to cultural artefacts from seal hides to rubber trading companies connected far flung regions at or beyond the frontier of empires to a growing global market for these commodities Satisfying the unsatiable appetite for commodities of industrializing economies in North America Europe and East Asia their nimble organisations and specialised trading skills allowed trading companies to harness

imperial geopolitics latch onto local networks and move across borders This book brings together a collection of case studies of commodity trading companies across a range of commodities and regions between the 1870s and the 1930s Through the lens of global value chains the contributions showcase how these companies continuously adapted their businesses to a world that was at once economically more integrated but politically increasingly competitive in this age of high imperialism and national competition The chapters in this book were originally published as a special issue of Business History

CHINA: FOOD SECURITY AND AGRICULTURAL GOING GLOBAL Han Jun, 2022-11-21 Through decades of efforts China has overall achieved self sufficiency in food supply which is the result of effective policies and measures adopted by the Chinese government This book focuses on China's food security strategy and agricultural going global strategy and goes into details on policies and measures for achieving domestic food security It specially analyzes status and development trend of China's corn industry since corn is the most sensitive grain variety that plays an important role as food feed and raw material for bioenergy It also studies overseas agricultural development potential for agricultural investment and cooperation globally It finally elaborates China's agricultural going global strategy with specific cases to evaluate policy effect in order to promote international cooperation in agriculture The conclusions are that as the world's most populated country China should rely on its domestic production to ensure food supply However with intensified constraints on resources and environment China should appropriately adjust its food security goals to ensure the basic self sufficiency of cereals and rely more on global markets for non cereal grain varieties Looking to the future China should establish a food security system that is efficient open and sustainable through profound reform to increase its domestic food productivity promote sustainable development of agriculture and expand international cooperation in agriculture

Multinationals and Global Capitalism Geoffrey Jones, 2005 This book provides a unique contribution to contemporary

globalization debates by providing an accessible survey of the growth and role of multinational enterprises in the world economy over the last two hundred years The author shows how entrepreneurs built a global economy in the nineteenth century by creating firms that pursued resources and markets across borders It demonstrates how multinationals shifted strategies as the first global economy disintegrated in the political and economic chaos between the two world wars and how they have driven the creation of the contemporary global economy Many of the issues of the global economy have been encountered in the past This book shows how entrepreneurs and managers met the political ethical cultural and organizational challenges of operating across national borders at different times and in different environments The role of multinationals is placed within their wider political and economic context There are chapters on the impact of multinationals and on relations with governments The focus on the shifting roles of firms and industries over time rather than abstract trade and capital flows provides compelling evidence on the diversity and discontinuities of the globalization process The book explains the history of multinationals across a wide spectrum of manufacturing service and natural resource industries from an international perspective which ranges widely across different countries It provides an essential historical framework for understanding global business An accessible survey of the history of international business worldwide this book will be key reading for students taking courses in International Business Business History Multinationals and Entrepreneurship and of interest to academics and researchers working in these areas
