Lees' Loss Prevention in the Process Industries Frank Lees, 2005-01-10 Over the last three decades the process industries have grown very rapidly with corresponding increases in the quantities of hazardous materials in process storage or transport Plants have become larger and are often situated in or close to densely populated areas Increased hazard of loss of life or property is continually highlighted with incidents such as Flixborough Bhopal Chernobyl Three Mile Island the Phillips 66 incident and Piper Alpha to name but a few The field of Loss Prevention is and continues to be of supreme importance to countless companies municipalities and governments around the world because of the trend for processing plants to become larger and often be situated in or close to densely populated areas thus increasing the hazard of loss of life or property This book is a detailed guidebook to defending against these and many other hazards It could without exaggeration be referred to as the bible for the process industries This is THE standard reference work for chemical and process engineering safety professionals For years it has been the most complete collection of information on the theory practice design elements equipment regulations and laws covering the field of process safety An entire library of alternative books and cross referencing systems would be needed to replace or improve upon it but everything of importance to safety professionals engineers and managers can be found in this all encompassing reference instead Frank Lees world renowned work has been fully revised and expanded by a team of leading chemical and process engineers working under the guidance of one of the world s chief experts in this field Sam Mannan is professor of chemical engineering at Texas A principles practice codes standards data and references needed by those practicing in the field **MAINTENANCE ENGINEERING AND MANAGEMENT, SECOND EDITION** MISHRA, R. C., PATHAK, K., 2012-04-02 Maintenance of equipment machinery systems and allied infrastructure comprises the ways and means of optimizing the available resources of manpower materials tools and test equipment within a set of constraints to help achieve the targets of an organization by minimizing the downtimes Whether the goal is to produce and sell a product at a profit or is simply to perform a mission in a cost effective

manner the maintenance principles discussed in this text apply equally to all such types of organizations In consonance with the growth of the industry and its modernization and the need to minimize the downtimes of machinery and equipment the engineering education system has included maintenance engineering as a part of its curriculum This second edition of the book continues to focus on the basics of this expanding subject with a broad discussion of management aspects as well for the benefit of the engineering students It explains the concept of a maintenance system the evaluation of its maintenance functions maintenance planning and scheduling the importance of motivation in maintenance the use of computers in maintenance and the economic aspects of maintenance This book also discusses the manpower planning and energy conservation in maintenance management Presented in a readable style the book brings together the numerous aspects of maintenance functions emphasizing the importance of this discipline in the engineering education In this edition a new chapter titled Advances in Maintenance Chapter 21 has been included to widen the coverage of the book Besides the students of engineering especially those in streams of mechanical engineering and its related disciplines such as mining industrial and production this book will be useful to the practising engineers as well

Rubber Processing and Production Organization P.K. Freakley, 2012-12-06 The absence of a book dealing with rubber processing has been apparent for some time and it is surprising that a straightforward text has not been produced However this book goes far beyond the scope of a simple technical approach and deals with the full spectrum of activities which lead to successful and profitable product manufacture The need to deliver a product to a customer at the right time at the right cost and at the right quality is a basic premise on which the book is based The increasingly stringent demands of customers for products that can be introduced directly into an assembly or production line without goods inwards inspection are placing increasing pressures on the manufacturer As a result it is becoming essential to achieve and sustain product quality and consistency by the monitoring and control of manufacture at a level which renders all products saleable The book has been written to satisfy the needs of practitioners in the rubber industry and is certainly not another descriptive text which is only read for interest when more important matters are not pressing My close cooperation with Philip K Freakley during the writing of the book has resulted in the incorporation of many of the viewpoints and methods which I have developed and refined during more than 38 years in the rubber industry
