Today's economic challenges need to generate the proper context for renewed investment in people, and I am reinforcing the 2009 investments in education, health, research, innovation, and workforce development for the nation's challenge. I must not overpromise other leaders of the private and public sectors. Education is a long-term project, and I will need to improve my communication, public skills, and other weaknesses.

Transforming Nursing Education Through Problem-based Learning Elizabeth Rideout, 2001 With the growing interest in problem based learning among nurse educators worldwide comes the need for a book that will be a comprehensive guide and resource for anyone considering its implementation in nursing education This book is that resource Its strength is its integration of relevant theory research and practical information It is an invaluable resource for nursing faculty contemplating the use of the problem based learning model

Knowledge Sharing in the Integrated Enterprise Peter Bernus, Mark Fox, 2006-03-09 Enterprise Architects in their endeavor to achieve Enterprise Integration have limited guidance on how best to use Enterprise Models and Modeling Tools to support their practice It is widely recognized that the practice of engineering enterprises needs a number of models but how to maintain the relation between these models with ease is still a problem Model interoperability is an issue on multiple counts How to interchange models between enterprise modeling tools How to maintain the interdependencies between models whether they describe the enterprise on the same level but from different points of view or from the same point of view but on different levels of abstraction and granularity How to maintain a coherent and evolving set of enterprise models in support of continuous change processes How to use and reuse enterprise models as a knowledge resource The answers to these questions are of great importance to anyone who is implementing ISO9001 2000 requirements whether through using enterprise architecture practice or not although it can be argued that a well executed architecture practice should satisfy ISO9001 without additional effort This volume attacks the problem on three fronts 1 Authors working in international standardisation and tool development as well as in enterprise modeling research present the latest developments in semantic integration 2 Authors who are practitioners of or conducting active research in enterprise architecting methodologies give an account on the latest developments and strategic directions in architecture frameworks and methodologies 3 Authors who use or develop information integration infrastructures present best practice and future trends of this aspect of enterprise integration Chapters of this book include contributions to the International Conference on Enterprise Integration and Modelling Technology ICEIMT 04 and those presented at the Design of Information Infrastructure Systems for Manufacturing DIISM 04 Workshop While DIISM is traditionally oriented at supporting manufacturing practice the results have a far greater domain of applicability
