Competition Law And Economic Regulation Making And Managing Markets:

Competition Law and Economic Regulation Niamh Dunne, 2015 Niamh Dunne undertakes a systematic exploration of the relationship between competition law and economic regulation as legal mechanisms of market control Beginning from a theoretical assessment of these legal instruments as discrete mechanisms the author goes on to address numerous facets of the substantive interrelationship between competition law and economic regulation She considers amongst other aspects the concept of regulatory competition law deregulation liberalisation and regulation for competition the concurrent application of competition law in regulated markets and relevant institutional aspects including market study procedures the distribution of enforcement powers between competition agencies and sector regulators and certain legal powers that demonstrate a hybridised quality lying between competition law and economic regulation Throughout her assessment Dunne identifies and explores recurrent considerations that inform and shape the optimal relationship between these legal mechanisms within any jurisdiction

Making and Managing Markets Niamh Mary Dunne, 2013 **Competition Law and Economic Regulation** Niamh Dunne, 2015-03-26 Niamh Dunne undertakes a systematic exploration of the relationship between competition law and economic regulation as legal mechanisms of market control Beginning from a theoretical assessment of these legal instruments as discrete mechanisms the author goes on to address numerous facets of the substantive interrelationship between competition law and economic regulation She considers amongst other aspects the concept of regulatory competition law deregulation liberalisation and regulation for competition the concurrent application of competition law in regulated markets and relevant institutional aspects including market study procedures the distribution of enforcement powers between competition agencies and sector regulators and certain legal powers that demonstrate a hybridised quality lying between competition law and economic regulation Throughout her assessment Dunne identifies and explores recurrent considerations that inform and shape the optimal relationship between these legal mechanisms within any jurisdiction

Application of Anti-manipulation Law to EU Wholesale Energy Markets and Its Interplay with EU Competition Law Huseyin Cagri Corlu, 2018-06-05 In the course of energy liberalisation electricity and natural gas contracts have been separated from physical delivery and these contracts are now traded as commodities in multilateral trading facilities Although designed to render energy trading standardised and efficient this system raises serious questions as to whether existing regulatory and antitrust provisions are sufficient to address market abuses that cause imbalances in demand and supply The European Union's EU's Regulation on Wholesale Energy Market Integrity and Transparency REMIT adopted to combat such market manipulation is still lacking in significant case law to bolster its effectiveness Addressing this gap this invaluable book provides the first in depth analysis of market manipulation in the energy sector offering a deeply informed understanding of the new anti manipulation rules and their implementation and enforcement Focusing on practices that perpetrators employ to manipulate electricity and natural gas markets and the applicability of anti manipulation rules to

combat such practices the analysis examines such issues and topics as the following factors and circumstances that determine when and what market misconduct can be subject to enforcement the European Commission's criteria to determine whether a particular market is susceptible to regulation jurisdiction of REMIT and the Market Abuse Regulation MAR with respect to the prohibitions of insider trading in financial wholesale energy markets to what extent anti manipulation rules and EU competition law may be applied concurrently and types of physical and financial instruments that market participants have employed in devising their manipulative schemes Because market manipulation is rather new in the EU context but has been prohibited and prosecuted under US law for over a century much of the case law analysis is from the United States and greatly clarifies how anti manipulation rules may be enforced A concluding chapter offers policy recommendations to mitigate legal uncertainties arising from REMIT Energy market participants such as energy producers wholesale suppliers traders transmission system operators and their counsel and legal practitioners in the field will welcome this book's extensive legal analysis and its clear demarcation of the objectives that REMIT seeks to accomplish with respect to energy market liberalisation

Market Investigations Massimo Motta, Martin Peitz, Heike Schweitzer, 2022-01-06 In many economic sectors the digital industries being first and foremost the market power of dominant firms has been steadily increasing and is rarely challenged by competitors Existing competition laws and regulations have been unable to make markets more contestable The book argues that a new competition tool is needed market investigations This tool allows authorities to intervene in markets which do not function as they should due to market features such as network effects scale economies switching costs and behavioural biases The book explains the role of market investigations assesses their use in the few jurisdictions where they exist and discusses how they should be designed In so doing it provides an invaluable and timely instrument to both practitioners and academics

Competition Law and Economic Inequality Jan Broulík, Katalin Cseres, 2022-12-15 The gap between the rich and poor is widening across the globe This book explores whether this major societal challenge of our time can be addressed by the means of competition law The primary goal of today's competition law is to ensure that market power does not lead to an inefficient production of goods and services Nevertheless even such efficiency oriented curbing of market power may arguably contribute to the reduction of differences in how much people own and earn Furthermore many competition law regimes do take into account distributive considerations too The chapters investigate the relationship between competition law and economic inequality from philosophical historical and economic perspectives Their inquiries concern the conceptual foundations of competition law and doctrinal frameworks of individual jurisdictions as well as specific problems and markets As such the book provides a novel and comprehensive overview of whether and how competition law can contribute to more equality in both developed and developing countries The book is a must read for researchers public officials judges and practitioners within the competition law community It will also appeal to anyone more broadly interested in issues of inequality and economic policy

Competition Law and Policy in Digital

Markets Maria Ioannidou, Bingwan Xiong, 2025-03-01 The advent of digital technologies has transformed markets and resulted in unprecedented levels of market concentration with a handful of digital giants controlling the provision of many goods and services Against these changing market dynamics Competition Law and Policy in Digital Markets A Comparative Analysis of the EU and China provides a critical comparative analysis of the application of competition law in digital markets in the EU and China The book deciphers how these two key competition law jurisdictions apply their respective competition laws against different digital giants and the potential impact of those applications in the evolution of digital markets This book first maps the characteristics of digital markets and the challenges they raise for competition law enforcement and second critically discusses decisional practice and policy developments in the EU and China The discussion identifies potential competition law problems in the digital economy and covers various types of anti competitive conduct at the intersection of consumer data protection and competition law It also identifies contentious cases querying whether competition law can act as a gap filler or whether other regulatory tools are better suited to address such problems Pioneering and timely Competition Law and Policy in Digital Markets examines the challenges posed to competition law enforcement by these new dynamics The similarities and divergent approaches between competition law enforcers in the EU and China are examined in a bid to contribute to a more transparent debate between the two *Comparative Competition Law and Economics* Roger J. Van den Bergh, 2017-09-29 Offering a concise and critical comparison of EU competition law and US antitrust law from an economic perspective this is the ideal textbook for international and interdisciplinary courses combining law and economic approaches *The New EU Competition Law* Pablo Ibáñez Colomo, 2023-12-14 This book provides the first comprehensive account of the New EU Competition Law an emerging understanding of the discipline that breaks from the consensus of the early 2000s and that ventures into uncharted territories Competition law has undergone fundamental transformations in the past decade from the rise and fall of the effects based approach to the challenge of Big Tech and the growing interaction with intellectual property Making sense of these changes and fully grasping their implications can be difficult The book discusses the shift from traditional enforcement in the industrial era to the sort of intervention that a knowledge based economy demands It presents the changes that the field is undergoing policy priorities relationship with regulation and intangible assets move away from efficiency and consumer welfare and illustrates them by reference to the most significant developments The analysis includes an up to date evaluation of the Digital Markets Act and addresses the application of EU competition law to key areas including energy pharma telecommunications and online platforms Conceived as a modular book practitioners and advanced students will find it useful as a map to navigate the underlying trends and as an in depth dissection of the key case law and administrative practice of the past decade *Research Handbook on Abuse of Dominance and Monopolization* Pinar Akman, Or Brook, Konstantinos Stylianou, 2023-01-20 This Research Handbook offers a comprehensive and state of the art collection on the competition law

antitrust prohibition of abuse of a dominant position and monopolization It draws from the long and influential traditions of leading jurisdictions such as the European Union and the United States to analyse applicable rules and policy in these jurisdictions It also takes a comparative approach to identify common threads and differences
