Bridging Theory and Practice in Teacher Education, 2007-01-01 This book addresses both the concerns of teacher candidates and their misconceptions about the relation of theory and practice in education The contributors to this volume share the belief that theories provide teachers with a frame of reference and a language with which to name and critically analyze many of the problems they face daily The significance of theory is in its ability to define the problems that teachers face clarify their confusions and suggest possible solutions to these problems Once educational theories are viewed as guides to thought and instruments of interpretation rather than as established facts it becomes clear that they cannot simply be plugged into a particular classroom Instead a theory must be applied in more nuanced and contextual ways taking into account the social historical context in which it was created as well as the various particulars of each classroom situation Experienced educators and scholars in the field have been recruited to write essays that speak to the relevance of different theories in philosophy psychology sociology English history science art technology and multiculturalism for the practice of teaching This

Hilton, 2019-04-01 Multicultural education has become its own discipline developed on the shoulders of the work of giants who argued its merit during the attacks of opponents who believed assimilation was the purpose of state sponsored education In an age of rising populism and nationalism throughout the Western world again questioned is the merit of multicultural education In the shadows of Brexit and an America First agenda where migration patterns across the world have led to demographic shifts it is evident even in the richest countries in the world that gaps in opportunity and subsequently achievement still exist Disparities in achievement lead some to question whether multicultural education works and others to revert to old notions that ethnically and linguistically marginalized students are in fact deficient The scholars here believe in the untapped potential of all children and illuminate how educational structures have muffled the cultivation of that potential Contributors argue the goals of multicultural education have not been achieved in part due to the piecemeal application of its tenants The scholarship in this volume illustrates the state of multicultural education and articulates what educators committed to equity inclusion and a more just society must do to ensure the goals of multicultural education survive in the current age The authors of these chapters bridge foundational knowledge with contemporary understandings making the work both accessible for novices and beneficial for the authorities on multicultural education With the diverse cast of contributors and topics ranging from mathematics instruction to discipline practices this volume provides thoughtful discourse on issues of access access to curricular content access to opportunities to learn as well as impediments to access Containing chapters that speak to discipline specific pedagogical practices the structures of schooling teacher education and research methodologies the collected work encourages scholars and practitioners to not be discouraged in the age of retrenchment
