Brinkman's Cumulatieve catalogus van boeken de in Nederland en vlaanderen zijn uitgegeven of herdrukte ,2001 **Brinkman's cumulatieve catalogus van boeken** ,2002 Voorts een alphabetische lijst van Nederlandsche boeken in Belgi uitgegeven **Data Transformation for Privacy-preserving Data Mining** Stanley Robson de Medeiros Oliveira, 2005 The sharing of data is often beneficial in data mining applications It has been proven useful to support both decision making processes and to promote social goals However the sharing of data has also raised a number of ethical issues Some such issues include those of privacy data security and intellectual property rights In this thesis we focus primarily on privacy issues in data mining notably when data are shared before mining Specifically we consider some scenarios in which applications of association rule mining and data clustering require privacy safeguards Addressing privacy preservation in such scenarios is complex One must not only meet privacy requirements but also guarantee valid data mining results This status indicates the pressing need for rethinking mechanisms to enforce privacy safeguards without losing the benefit of mining These mechanisms can lead to new privacy control methods to convert a database into a new one in such a way as to preserve the main features of the original database for mining In particular we address the problem of transforming a database to be shared into a new one that conceals private information while preserving the general patterns and trends from the original database To address this challenging problem we propose a unified framework for privacy preserving data mining that ensures that the mining process will not violate privacy up to a certain degree of security The framework encompasses a family of privacy preserving data transformation methods a library of algorithms retrieval facilities to speed up the transformation process and a set of metrics to evaluate the effectiveness of the proposed algorithms in terms of information loss and to quantify how much private information has been disclosed Our investigation concludes that privacy preserving data mining is to some extent possible We demonstrate empirically and theoretically the practicality and feasibility of achieving privacy preservation in data mining Our experiments reveal that our framework is effective meets privacy requirements and guarantees valid data mining results while protecting sensitive information e g sensitive knowledge and individuals privacy **Privacy, Big Data, and the Public Good** Julia Lane, Victoria Stodden, Stefan Bender, Helen Nissenbaum, 2014-06-09 Data access is essential for serving the public good This book provides new frameworks to address the resultant privacy issues **Discrimination and Privacy in the Information Society** Bart Custers, Toon Calders, Bart Schermer, Tal Zarsky, 2014-09-20 Vast amounts of data are nowadays collected stored and

processed in an effort to assist in making a variety of administrative and governmental decisions These innovative steps considerably improve the speed effectiveness and quality of decisions Analyses are increasingly performed by data mining and profiling technologies that statistically and automatically determine patterns and trends However when such practices lead to unwanted or unjustified selections they may result in unacceptable forms of discrimination Processing vast amounts of data may lead to situations in which data controllers know many of the characteristics behaviors and whereabouts of people In some cases analysts might know more about individuals than these individuals know about themselves Judging people by their digital identities sheds a different light on our views of privacy and data protection This book discusses discrimination and privacy issues related to data mining and profiling practices It provides technological and regulatory solutions to problems which arise in these innovative contexts The book explains that common measures for mitigating privacy and discrimination such as access controls and anonymity fail to properly resolve privacy and discrimination concerns Therefore new solutions focusing on technology design transparency and accountability are called for and set forth
