Atlas of Robotic Cardiac Surgery W.Randolph Chitwood, 2014-06-13 Robotic surgery is currently devoid of adequate didactic material necessary to facilitate daily application in cardiothoracic surgical practice This book represents the definitive atlas that will lead both the practicing and new cardiothoracic surgeons in these methods It will define the operative pathway of each procedure from beginning to end for surgeons who wish to be a complete robotic cardiac surgeon and include hints and procedural pitfalls derived from the experiences of chapter contributors The book will

be illustrated with high quality illustrations and color photographs from surgical operations where appropriate. Leading surgeons have contributed to the book and provided sample illustrations for their respective chapters. Anesthetic and cardiopulmonary support preparation for each operation will be included and selected references will be provided to emphasize evidence based outcomes.

Therapeutic Revolutions Jeremy A. Greene, Flurin Condrau, Elizabeth Siegel Watkins, 2016-11-23 When asked to compare the practice of medicine today to that of a hundred years ago most people will respond with a story of therapeutic revolution. Back then we had few effective remedies but now we have more and more powerful tools to fight disease from antibiotics to psychotropics to steroids to anticancer agents. This collection challenges the historical accuracy of this revolutionary narrative and offers instead a more nuanced account of the process of therapeutic innovation and the relationships between the development of medicines and social change. These assembled histories and ethnographies span three continents and use the lived experiences of physicians and patients, consumers and providers and marketers and regulators to reveal the tensions between universal claims of therapeutic knowledge and the actual ways these claims have been used and understood in specific sites from postwar West Germany pharmacies to twenty first century Nigerian street markets. By asking us to rethink a story we thought we knew *Therapeutic Revolutions* offers invaluable insights to historians, anthropologists and social scientists of medicine.

Advanced Therapy in Cardiac Surgery Kenneth L. Franco, Edward D. Verrier, 2003 *Advanced Therapy in Cardiac Surgery* Second Edition This second edition of *Advanced Therapy in Cardiac Surgery* presents state of the art techniques and an in depth review of cardiac surgery from the leading authorities. Each of the 62 succinct chapters represents the personal treatment protocols of the experts. The

Advanced Techniques in Extracorporeal Circulation 4E Philip Kay, Christopher M Munsch, 2004-04-30 Extracorporeal circulation has become firmly established as an invaluable and routine adjunct to cardiac and vascular surgery. Since its introduction in 1953 the technique has evolved rapidly with advancing technology leading to improvements in and simplification of the equipment involved. Developments in the understanding and application of basic science have also had a huge impact as our understanding of the complex anatomy, biochemistry, pharmacology and pathophysiology of the heart continues to grow. It is these advances in both technology and science that form the basis of this fourth edition of *Techniques in Extracorporeal Circulation*. The book continues to provide a comprehensive overview of the field covering both established techniques for those new to the field of extracorporeal circulation and current and future developments. It attempts to answer some of the innumerable practical problems associated with the routine use of artificial circulation and oxygenation and hopes to stimulate thought and debate among its readers regarding more complex or controversial issues. Topics new to the fourth edition include robotic surgery and off pump surgery while other chapters have been thoroughly revised and updated to take into account developments and changes in the field. With its multidisciplinary approach the book will remain an essential reference for all health care professionals working in the cardiac surgical operating room, in particular.
