China After Princeton Legacy Library:

Chinese Economic Diplomacy Shuxiu Zhang, 2016-07-01 Economic diplomacy was declared in 2013 by Beijing as a priority in its comprehensive strategy for diplomacy. The political elite undertook to further invest in economic diplomacy as an instrument for economic growth and development. Globally, Chinese cooperation in multilateral economic processes has become critical to achieving meaningful outcomes. However, little understanding exists in current literature on the factors and mechanisms which shape the processes behind China's economic diplomacy decision making. *Chinese Economic Diplomacy* provides an understanding of the processes and practices of China's economic diplomacy with multilateral economic negotiations as the primary basis of analysis, specifically the UN climate change talks and the WTO Doha Round trade negotiations. It examines how early economic diplomacy in global governance contributed to the varied and evolving nature of its present day decision making structures and processes. Demonstrating how China's negotiation preferences are driven by networks of political actors in formal and informal domestic and systemic environments, it also highlights the capacity of international negotiation practices to alter and re-shape China's approach to multilateral economic negotiations. As a consequence, the book presents a framework for understanding China's economic diplomacy decision making processes that is systemically constructed by domestic and international agencies. Offering a Chinese perspective of the notion of economic diplomacy, this book will be of interest to students and scholars of Chinese Economics, International Relations and Political Economy.

Asia's Reckoning Richard McGregor, 2017-09-05 A Financial Times Best Book of 2017. A shrewd and knowing book. Robert D. Kaplan, *The Wall Street Journal*. A compelling and impressive read. *The Economist*. Skillfully crafted and well argued. Jeffrey Wasserstrom, *Financial Times*. An excellent modern history provides the context needed to make sense of the region's present and future. Joyce Lau, *South China Morning Post*. A history of the combative military, diplomatic and economic relations among China, Japan and the United States since the 1970s and the potential crisis that awaits them. Richard McGregor's *Asia's Reckoning* is a compelling account of the widening geopolitical cracks in a region that has flourished under an American security umbrella for more than half a century. The toxic rivalry between China and Japan, two Asian giants consumed with endless history wars and ruled by entrenched political dynasties, is threatening to upend the peace underwritten by Pax Americana since World War II. Combined with Donald Trump's disdain for America's old alliances and China's own regional ambitions, East Asia is entering a new era of instability and conflict. If the United States laid the postwar foundations for modern Asia, now the anchor of the global economy, *Asia's Reckoning* reveals how that structure is falling apart. With unrivaled access to archives in the United States and Asia, as well as to many of the major players in all three countries, Richard McGregor has written a tale that blends the tectonic shifts in diplomacy with bitter domestic politics and the personalities driving them. It is a story not only of an overstretched America but also of the rise and fall and rise of the great powers of Asia. The about turn of Japan from a colossus seemingly poised for world domination to a nation in inexorable

decline in the space of two decades has few parallels in modern history as does the rapid rise of China a country whose military is now larger than those of Japan South Korea Taiwan and southeast Asia s combined The confrontational course on which China and Japan are set is no simple spat between neighbors the United States would be involved on the side of Japan in any military conflict between the two countries The fallout would be an economic tsunami affecting manufacturing centers trade routes and political capitals on every continent Richard McGregor s book takes us behind the headlines of his years reporting as the Financial Times s Beijing and Washington bureau chief to show how American power will stand or fall on its ability to hold its ground in Asia

Modernism in Late-Mao China Ke Song, 2023-04-28 This book investigates the architectural history of China in the Mao era 1949 1976 focusing on the rise of modernism in the last seven years of the Cultural Revolution from 1969 to 1976 It highlights the new architecture of this period exemplified by three clusters of buildings for foreign affairs namely buildings for foreign diplomacy in Beijing buildings for foreign trade in Guangzhou and China's foreign aid projects overseas The emergence of new architecture in the early 1970s is closely associated with China's political and diplomatic shift of the time from a radical emphasis on ideological struggle to a dynamic balance between leftist ideology and pragmatic concerns In this context China's relations with the West quickly improved culminating with American president Richard Nixon's visit to China in 1972 The increasing foreign affairs brought new opportunities to Chinese architects who referenced both Western modernism and Chinese architectural traditions to create a new version of Chinese modernism The book brings dimensions of form politics and knowledge to the analysis of architecture to construct an understanding of architectural design as an aesthetic political and intellectual practice
