We Are All Targets Matt Potter, 2023-01-10 The incredible untold origin story of cyberwar and the hackers who unleashed it on the world tracing their journey from the ashes of the Cold War to the criminal underworld governments and even Silicon Valley Two years before 9 11 the United States was attacked by an unknown enemy No advance warning was given and it didn t target civilians Instead tomahawk missiles started missing their targets US agents were swept up by hostile governments and America s enemies seemed to know its every move in advance A new phase of warfare cyber war had arrived And within two decades it escaped Pandora s Box plunging us into a state of total war where every day countless cyber attacks perpetrated by states and mercenaries are reshaping the world After receiving an anonymous email with leaked NATO battle plans during the bombardment of Kosovo journalist Matt Potter embarked on a twenty year investigation into the origins of cyber war and how it came to dominate the world He uncovered

its beginnings worthy of a Bond movie in the last days of the Cold War as the US and its allies empowered a generation of Eastern European hackers only to wake up in the late 90s to a new world order It s a story that winds through Balkan hacking culture Russia Silicon Valley and the Pentagon introducing us to characters like a celebrity hacker with missing fingers who keeps escaping prison FBI agents chasing the first generation of cyber mercenaries in the 90s tech CEOs and Russian generals obsessed with a Cold War rematch Never before told this is the riveting secret history of cyberwar not as governments want it to be controlled military directed discreet and sophisticated but as it really is anarchic chaotic dangerous and often thrilling

Industry of Anonymity Jonathan Lusthaus, 2018-10-16 The most extensive account yet of the lives of cybercriminals and the vast international industry they have created deeply sourced and based on field research in the world s technology crime hotspots Cybercrime seems invisible Attacks arrive out of nowhere their origins hidden by layers of sophisticated technology Only the victims are clear But every crime has its perpetrator specific individuals or groups sitting somewhere behind keyboards and screens Jonathan Lusthaus lifts the veil on the world of these cybercriminals in the most extensive account yet of the lives they lead and the vast international industry they have created We are long past the age of the lone adolescent hacker tapping away in his parents basement Cybercrime now operates like a business Its goods and services may be illicit but it is highly organized complex driven by profit and globally interconnected Having traveled to cybercrime hotspots around the world to meet with hundreds of law enforcement agents security gurus hackers

and criminals Lusthaus takes us inside this murky underworld and reveals how this business works He explains the strategies criminals use to build a thriving industry in a low trust environment characterized by a precarious combination of anonymity and teamwork Crime takes hold where there is more technical talent than legitimate opportunity and where authorities turn a blind eye perhaps for a price In the fight against cybercrime understanding what drives people into this industry is as important as advanced security Based on seven years of fieldwork from Eastern Europe to West Africa Industry of Anonymity is a compelling and revealing study of a rational business model which however much we might wish otherwise has become a defining feature of the modern world
