*Disasters Without Borders* John Hannigan, 2013-04-17 Dramatic scenes of devastation and suffering caused by disasters such as the 2011 Japanese earthquake and tsunami are viewed with shock and horror by millions of us across the world What we rarely see however are the international politics of disaster aid mitigation and prevention that condition the collective response to natural catastrophes around the world In this book respected Canadian environmental sociologist John Hannigan argues that the global community of nations has failed time and again in establishing an effective and binding multilateral mechanism for coping with disasters especially in the more vulnerable countries of the South Written in an accessible and even handed manner *Disasters without Borders* it is the first comprehensive account of the key milestones debates controversies and research relating to the international politics of natural disasters Tracing the historical evolution of this policy field from its humanitarian origins in WWI right up to current efforts to cast climate change as the prime global driver of disaster risk it highlights the ongoing mismatch between the way disaster has been conceptualised and the institutional architecture in place to manage it The book's bold conclusion predicts the confluence of four emerging trends politicisation militarisation catastrophic scenario building privatisation of risk and quantification which could create a new system of disaster management wherein insurance logic will replace humanitarian concern as the guiding principle *Disasters Without Borders* is an ideal introductory text for students lecturers and practitioners in the fields of international development studies disaster management politics and international affairs and environmental geography sociology

**Building Disaster Recovery Institutions Through South-South Policy Transfer: A Comparative Case Study of Indonesia and Haiti** Ralph Myers, 2013-10 Since the humanitarian response to the 1994 Rwanda genocide there has been a growing body of literature on quality and accountability in humanitarian action One of the most recent trends has been a focus on humanitarian cooperation between the governments of disaster affected countries and other humanitarian actors The research presented in this book builds on this trend by comparing two governmental recovery agencies namely the Interim Haiti Recovery Commission IHRC and the Aceh Nias Rehabilitation and Reconstruction Agency BRR Through a review of the literature on policy transfer the creation of an integrated conceptual analytical framework for policy transfer and the application of Lijphart's comparative method the research attempts to identify both whether or not policy transfer

occurred between the two contexts as well as the possible causes for the difference in both agencies ability to build back better The outcomes of the research are then used to suggest possible areas of future research and related hypotheses

*Post-Disaster Reconstruction of the Built Environment* Dilanthi Amaratunga, Richard Haigh, 2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency scale and intensity Despite huge improvements in the emergency response permanent reconstruction is often uncoordinated inefficiently managed and slow to begin International agencies are geared to an efficient response in terms of humanitarian relief but they are not well versed in the requirements of long term reconstruction which is often constrained by lack of planning and poorly coordinated management The construction industry is typically engaged in a range of critical activities after a disaster including provision of temporary shelter in the immediate aftermath and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to Post Disaster Reconstruction of the Built Environment identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult Written by an international team of experts this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man made disaster and identify the planning and management processes required by the industry to mount an effective response

**Natural Hazards and Disasters** Bimal Kanti Paul, 2020-12-07 This two volume encyclopedia provides the science behind such heart pumping geophysical hazards as volcanic eruptions earthquakes cyclones and floods as well as authoritative entries on notable natural disasters around the world and the agencies that help those they impact Natural Hazards and Disasters explores the sometimes harsh effects of nature on human life The set discusses the physical science behind specific types of hazards and disasters such as blizzards and tsunamis their impact on our lives how damage is mitigated or prevented recovery and reconstruction and the current research and technology used for managing or even eliminating the hazards Written by experts in the field the set also explores a variety of extreme events from around the world including the 2010 2011 Christchurch Earthquakes New Zealand the 2017 2018 Thomas Fire United States and the 2018 Kerala Floods India Also covered are the world s major international and nonprofit aid agencies like the Salvation Army and Oxfam that assist disaster victims

**Smart, Resilient and Transition Cities** Adriana Galderisi, Angela Colucci, 2018-07-17 Smart Resilient and Transition Cities Emerging Approaches and Tools for Climate Sensitive Urban Development starts with a presentation of three widespread Urban Metaphors which are gaining increasing attention from urban planners and decision makers Smart City Resilient City and Transition Towns being all of them focused on the need for enhancing cities capacities to cope with the multiple and heterogeneous challenges threatening contemporary cities and their future development and above all with climate issues Then the Authors provide an overview of current large scale and urban strategies to counterbalance climate change so far undertaken in different geographical contexts Europe United States

China Africa and Australia shedding light on the different approaches on the different weights assigned to mitigation and adaptation issues as well as on the main barriers hindering their effectiveness and translation into measurable outcomes Opportunities and criticalities arising from the rich sprawled and blurred landscape of current strategies and initiatives in the face of climate change pave the way to a discussion on the lessons learnt from current initiatives and provide new hints for developing integrated climate strategies capable to guide planners and decision makers towards a climate sensitive urban development Smart Resilient and Transition Cities Emerging Approaches and Tools for Climate Sensitive Urban Development merges a scientific approach with a pragmatic one Through a case study approach the Authors explore strengths and weaknesses of institutional and informal practices to foreshadow innovative paths for an adaptive process of urban governance in the face of climate change The book guides the reader along new governance paths characterized by continuous learning and close cooperation and communication among different actors and stakeholders and in so doing helps them to overcome current siloed approaches to climate issues Links resilience smart growth low carbon urbanism climate friendly cities sustainable development and transition cities being all these concepts crucial to improve effective climate policies Includes a number of case studies showing how cities different in size geographical cultural and economic contexts are currently dealing with climate issues grasping synergies and commonalities arising from current institutional practices and transition initiatives Provides strategic and operative guidelines to overcome barriers and critical issues emerging from current practices promoting cross sectoral approaches to counterbalance climate change

**The Asian Tsunami and Post-Disaster Aid** Sunita Reddy, 2018-07-11 Through the lens of the Asian tsunami this book problematizes concepts that are normally taken for granted in disaster discourse including relief recovery reconstruction and rehabilitation The unprecedented flow of humanitarian aid after the Asian tsunami though well intentioned showed adverse effects and unintended consequences in the lives of people in the communities across nations Aid led not only to widespread relief and recovery but also to an exacerbation of old forms of inequities and the creation of new ones arising from the prioritization distribution and management of aid This in turn led to the incongruity between the needs and expectations of the affected and the agendas of aid agencies and their various intermediaries This book examines the long term consequences of post disaster aid by posing the following questions What has the aid been expended on Where has the aid primarily been expended and how And what were the unintended consequences of post disaster aid for the communities This topical volume is of interest to social scientists human rights and law researchers and environmental scientists interested in disaster studies

**Urban Poverty in the Wake of Environmental Disaster** Maria Ela Atienza, Pauline Eadie, May Tan-Mullins, 2019-02-04 This book investigates the best strategies for poverty alleviation in post disaster urban environments and the conditions necessary for the success and scaling up of these strategies Using the case study of Typhoon Yolanda Haiyan in the Philippines the strongest typhoon ever to make landfall the book aims to draw out policy recommendations relevant for other

middle and lower income countries facing similar urban environmental challenges Humans are increasingly living in densely populated and highly vulnerable areas often coastal This increased density of human settlements leads to increased material damage and high death tolls and this vulnerability is often exacerbated by climate change This book focuses on urban population risk vulnerability to disasters resilience to environmental shocks and adaptation in relation to paths in and out of poverty Using both qualitative and quantitative methods including primary survey data from victims and those charged with overseeing the relief effort in the Philippines Urban Poverty in the Wake of Environmental Disaster has significant implications for disaster risk reduction as it relates to the urban poor and is highly recommended for scholars and practitioners of development studies environment studies and disaster relief and risk reduction *Safer Homes, Stronger Communities* Abhas K. Jha, 2010-01-15 This handbook is designed to guide public sector managers and development practitioners through the process of large scale housing reconstruction after major disasters based on the experiences of recent reconstruction programs in Aceh Indonesia Sri Lanka Pakistan Gujarat India and Bam Iran
