Women in the History of Analytic Philosophy Jeanne Peijnenburg, Sander Verhaegh, 2023-01-01 This book contains a selection of papers from the workshop Women in the History of Analytic Philosophy held in October 2019 in Tilburg the Netherlands It is the first volume devoted to the role of women in early analytic philosophy It discusses the ideas of ten female philosophers and covers a period of over a hundred years beginning with the contribution to the Significs Movement by Victoria Lady Welby in the second half of the nineteenth century and ending with Ruth Barcan Marcus's celebrated version of quantified modal logic after the Second World War The book makes clear that women contributed substantially to the development of analytic philosophy in all areas of philosophy from logic epistemology and philosophy of science to ethics metaphysics and philosophy of language It illustrates that although women's voices were no different from men's as regards their scope and versatility they had a much harder time being heard The book is aimed at historians of philosophy and scholars in gender studies

How Theology Shaped Twentieth-Century Philosophy Frank B. Farrell, 2019-03-14 Re-examines our relationship to the modern world by providing new perspectives on the influence of medieval Jewish and Christian theologies

Analytic Philosophy: The History of an Illusion Aaron Preston, 2010-12-16

The Analytic Imaginary Marguerite La Caze, 2018-09-05 The notion of the philosophical imaginary developed by Michel Le Doeuff refers to the capacity to imagine as well as to the stock of images philosophers employ Making use of this notion Marguerite La Caze explores the idea of the imaginary of analytic philosophy Noting the marked tendency of analytic philosophy to be unselfconscious about the use of figurative language and the levels at which it works La Caze shows how analytic images can work to define the parameters of debates and exclude differing approaches including feminist ones La Caze focuses on five influential types of images in five central areas of contemporary analytic philosophy analogies and how they are used in the abortion debates thought experiments in personal identity the

myth of the social contract Thomas Nagel's use of visual and spatial metaphors in epistemology and Kendall Walton's use of children's games as a foundational model in aesthetics The author shows how the image promotes assumptions and conceals tensions in philosophical works how the image persuades and how it limits debate and excludes ideas In providing an analysis of and reflection on the nature of the analytic imaginary La Caze suggests that a more open ended and reflexive approach can result in richer more fruitful philosophical work

Innovations in the History of Analytical Philosophy Sandra Lapointe, Christopher Pincock, 2017-09-18 This book offers new perspectives on the history of analytical philosophy surveying recent scholarship on the philosophical study of mind language logic and reality over the course of the last 200 years Each chapter contributes to a broader engagement with a wider range of figures topics and disciplines outside of philosophy than has been traditionally associated with the history of analytical philosophy The book acquaints readers with new aspects of analytical philosophy's revolutionary past while engaging in a much needed methodological reflection It questions the meaning associated with talk of analytic philosophy and offers new perspective on its development It offers original studies on a range of topics including in the philosophy of language and mind logic metaphysics and the philosophy of mathematics and figures whose relevance when they are not already established as in the case of Russell Moore and Wittgenstein are just now beginning to become the topic of mainstream literature Franz Brentano William James Susan Langer as well as the German and British logicians of the nineteenth century

Historiography and the Formation of Philosophical Canons Sandra Lapointe, Erich H. Reck, 2023-06-16 This book presents a series of case studies and reflections on the historiographical assumptions methods and approaches that shape the way in which philosophers construct their own past The chapters in the volume advance discussion of the methods of historians of philosophy while at the same time illustrating the various ways in which philosophical canons come into existence debunking the myth of analytical philosophy's ahistoricism and providing a deeper understanding of the roles historiographical devices play in philosophical thought More importantly the contributors attempt to understand history of philosophy in connection with other historical and historiographical approaches contributors engage classical history of science sociology of knowledge history of psychology and historiography in dialogue with historiographical practices in philosophy more narrowly construed Additionally select chapters adopt a more diverse perspective by making place for non Western approaches and for efforts to construe new philosophical narratives that do justice to the voice of women across the centuries *Historiography and the Formation of Philosophical Canons* will be of interest to researchers and advanced students working in history of philosophy meta philosophy philosophy of history historiography intellectual history and sociology of knowledge

Unfolding Social Constructionism Fiona J. Hibberd, 2006-11-24 For more than half of the 20 century psychologists sought to locate the causes of behaviour in individuals and tended to neglect the possibility of locating the psychological in the social In the late 1960s a reaction to that neglect brought about a crisis in social psychology This crisis did not affect all social psychologists

some remained seemingly oblivious to its presence others dismissed its significance and continued much as before But in certain quarters the psychological was re conceptualised as the social and the social was taken to be sui generis Moreover the possibility of developing general laws and theories to describe and explain social interaction was rejected on the grounds that as social beings our actions vary from occasion to occasion and are for many reasons unrepeatable There is so it was thought an inherent instability in the phenomena of interest The nomothetic ideal was said to rest on individualistic cause effect positivism of the kind which arguably characterised the natural sciences but social psychology so it was said is an historical inquiry and its conclusions are necessarily historically relative Gergen 1973 Events outside psychology converged to give impetus to the crisis within *Not Beyond Language* Khay Tham Nehemiah Lim, 2021-07-12 The problem of speaking about God arises from the presumed notion that God is utterly transcendent and is wholly other from human existence Moreover a profound sense of mystery is held to surround God's being Even so *Not Beyond Language* maintains that it is still possible for human beings to express and describe God in words that language can bring genuine disclosure and understanding of the divine However given that religious language is problematic because inadequate those who engage in speaking about God must accept that the words they use cannot be pressed to yield precise definitions or complete explanations of the divine The author proposes a nuanced approach to the use of religious language which revolves more around meaning and relevance of the discourse about divine reality than objective claims about who or what God is
