Coming Home To Eat The Pleasures And Politics Of Local Food:

Coming Home to Eat: The Pleasures and Politics of Local Food Gary Paul Nabhan, 2009-06-23 Food Eating Culture Gillian Crowther, 2018-05-15 From ingredients and recipes to meals and menus across time and space this highly engaging overview illustrates the important roles that anthropology and anthropologists play in understanding food and its key place in the study of culture The new edition now in full colour introduces discussions about nomadism commercializing food food security and ethical consumption including treatment of animals and the long term environmental and health consequences of meat consumption New feature boxes offer case studies and exercises to help highlight anthropological methods and approaches and each chapter includes a further reading section By considering the concept of cuisine and public discourse Eating Culture brings order and insight to our changing relationship with food **The Omnivore's Dilemma** Michael Pollan, 2015-08-04 This acclaimed bestseller and modern classic has changed America's relationship with food It's essential reading for kids who care about the environment and climate change What's for dinner seemed like a simple question until journalist and supermarket detective Michael Pollan delved behind the scenes From fast food and big organic to small farms and old fashioned hunting and gathering this young readers adaptation of Pollan's famous food chain exploration encourages kids to consider the personal and global implications of their food choices With plenty of photos graphs and visuals The Omnivore's Dilemma serves up a bold message to the generation most impacted by climate change It's time to take charge of our national eating habits and it starts with you The Routledge Companion to the Environmental Humanities Ursula Heise, Jon Christensen, Michelle Niemann, 2017-01-06 The Routledge Companion to the Environmental Humanities provides a comprehensive transnational and interdisciplinary map to the field offering a broad overview of its founding principles while providing insight into exciting new directions for future scholarship Articulating the significance of humanistic perspectives for our collective social engagement with ecological crises the volume explores the potential of the environmental humanities for organizing humanistic research opening up new forms of interdisciplinarity and shaping public debate and policies on environmental issues Sections cover The Anthropocene and the Domestication of Earth Posthumanism and Multispecies Communities Inequality and Environmental Justice Decline and Resilience Environmental Narratives History and Memory Environmental Arts Media and Technologies The State of the Environmental Humanities The first of its kind this companion covers essential issues and themes necessarily crossing disciplines within the humanities and with the social and natural sciences Exploring how the environmental humanities contribute to policy and action concerning some of the key intellectual social and environmental challenges of our times the chapters offer an ideal guide to this rapidly developing field Remaking the North American Food System C. Clare Hinrichs, Thomas A. Lyson, 2007 Examines the resurgence of interest in rebuilding the links between agricultural production and food consumption With examples from Puerto Rico to Oregon to Quebec this work offers a North American perspective attuned to trends toward globalization at the

level of markets and governance and shows how globalization affects specific localities *Food and World Culture* Linda S. Watts, Keltie Clark-Mahoney, 2022-08-23 This book uses food as a lens through which to explore important matters of society and culture In exploring why and how people eat around the globe the text focuses on issues of health conflict struggle contest inequality and power Whether because of its necessity pleasure or ubiquity the world of food and its lore proves endlessly fascinating to most people The story of food is a narrative filled with both human striving and human suffering However many of today's diners are only dimly aware of the human price exacted for that comforting distance from the lived world realities of food justice struggles With attention to food issues ranging from local farming practices to global supply chains this book examines how food's history and geography remain inextricably linked to sociopolitical experiences of trauma connected with globalization such as colonization conquest enslavement and oppression The main text is structured alphabetically around a set of 70 ingredients from almonds to yeast Each ingredient's story is accompanied by recipes Along with the food profiles the encyclopedia features sidebars These are short discussions of topics of interest related to food including automats diners victory gardens and food at world's fairs This project also brings a social justice perspective to its content weighing debates concerning food access equity insecurity and politics *Food Policy* Tim Lang, David Barling, Martin Caraher, 2009-03-19 For over half a century food policy has mapped a path for progress based upon a belief that the right mix of investment scientific input and human skills could unleash a surge in productive capacity which would resolve humanity's food related health and welfare problems It assumed that more food would yield greater health and happiness by driving down prices increasing availability and feeding more mouths In the 21st century this policy mix is quietly becoming unstuck In a world marred by obesity alongside malnutrition climate change alongside fuel and energy crises water stress alongside more mouths to feed and social inequalities alongside unprecedented accumulation of wealth the old rubric of food policy needs re evaluation This book explores the enormity of what the new policy mix must address taking the approach that food policy must be inextricably linked with public health environmental damage and social inequalities to be effective Written by three authors with differing backgrounds one in political science another in environmental health and health promotion and the third in social psychology this book reflects the myriad of perspectives essential to a comprehensive view of modern food policy It attempts to make sense of what is meant by food policy explores whether the term has any currency in current policy discourse assesses whether current policies help or hinder what happens judges whether consensus can triumph in the face of competing bids for understanding looks at all levels of governance across the range of actors in the food system from companies and the state to civil society and science considers what direction food policies are taking not just in the UK but internationally assesses who and what gains or loses in the making of these food policies and identifies a modern framework for judging how good or limited processes of policy making are This book provides a major comprehensive review of current and past food policy thinking and proposing the need for

what the authors call an ecological public health approach to food policy Nothing less will be fit for the 21st century *The Politics of the Pantry* Michael Mikulak,2013-10-01 What s for dinner has always been a complicated question The locavore movement has politicized food and challenged us to rethink the answer in new and radical ways These days questions about where our food comes from have moved beyond 100 mile dieters into the mainstream Celebrity chefs Jamie Oliver and Alice Waters alternative food gurus such as Michael Pollan and numerous other popular and academic commentators have all talked about the importance of understanding the sources and transformation of food on a human scale In *The Politics of the Pantry* Michael Mikulak interrogates these narratives what he calls storied food in food culture As with any story however it is important to ask who is telling it Who is the audience What assumptions are being made Mikulak examines competing narratives of food pleasure sustainability and value that have emerged from the growing sustainable food movement as well as food s past and present relationship to environmentalism in order to understand the potential and the limits of food politics He also considers whether or not sustainable food practices can address questions about health environmental sustainability and local economic development while at the same time articulating an ethical globalization An innovative blend of academic analysis poetic celebration and autobiography *The Politics of the Pantry* provides anyone interested in the future of food and the emergence of a green economy with a better understanding of how what we eat is transforming the world

Food Justice Robert Gottlieb,Anupama Joshi,2010-09-24 The story of how the emerging food justice movement is seeking to transform the American food system from seed to table In today s food system farm workers face difficult and hazardous conditions low income neighborhoods lack supermarkets but abound in fast food restaurants and liquor stores food products emphasize convenience rather than wholesomeness and the international reach of American fast food franchises has been a major contributor to an epidemic of globesity To combat these inequities and excesses a movement for food justice has emerged in recent years seeking to transform the food system from seed to table In *Food Justice* Robert Gottlieb and Anupama Joshi tell the story of this emerging movement A food justice framework ensures that the benefits and risks of how food is grown and processed transported distributed and consumed are shared equitably Gottlieb and Joshi recount the history of food injustices and describe current efforts to change the system including community gardens and farmer training in Holyoke Massachusetts youth empowerment through the Rethinkers in New Orleans farm to school programs across the country and the Los Angeles school system s elimination of sugary soft drinks from its cafeterias And they tell how food activism has succeeded at the highest level advocates waged a grassroots campaign that convinced the Obama White House to plant a vegetable garden The first comprehensive inquiry into this emerging movement *Food Justice* addresses the increasing disconnect between food and culture that has resulted from our highly industrialized food system

Citizenship and Immigration - Borders, Migration and Political Membership in a Global Age Ann E. Cudd,Win-chiat Lee,2016-08-10 This work offers a timely philosophical analysis of interrelated normative questions concerning immigration

and citizenship in relation to the global context of multiple nation states In it philosophers and scholars from the social sciences address both fundamental questions in moral and political philosophy as well as specific issues concerning policy Topics covered in this volume include the concept and the role of citizenship the equal rights and representation of citizens general moral frameworks for addressing immigration issues the duty to obey immigration law the use of ethnic cultural or linguistic criteria for selective immigration domestic violence as grounds for political asylum and our duty to refugees in general The urgency of the need to discuss these matters is clear Several humanitarian crises involving human migration across national boundaries stemming from war economic devastations gang violence and violence in ethnic or religious conflicts have unfolded Political debates concerning immigration and immigrant communities are continuing in many countries especially during election years While there have always been migrating human beings they raise distinctive issues in the modern era because of the political context under which the migrations take place namely that of a system of sovereign nation states with rights to control their borders and determine their memberships This collection provides readers the opportunity to parse these complex issues with the help of diverse philosophical moral and political perspectives
