Ross Stone, 2002-08-12 A triennial summation of the state of the art in radio science This book is the fourth in the modern series of triennial reviews

prepared by the International Union of Radio Science to further communication and understanding of the status and future of radio science both for those working in the field and for those who want to know what is of current importance in this area. The International Union of Radio Science (URSI) Union Radio Scientifique Internationale has divided the subject of Radio Science according to the ten topics of the Scientific Commissions that make up URSI. This volume consists of thirty-eight original peer-reviewed papers. Each paper provides a critical in-depth review of and in many cases a tutorial on advances and research that have been of significant importance within the area of interest of the Commissions during the past three to four years. Among the topics covered are Electromagnetic metrology, Fields and waves, Signals and systems, Electronics and photonics, Electromagnetic noise and interference, Wave propagation and remote sensing, Ionospheric radio and propagation, Waves in plasmas, Radio astronomy, Electromagnetics in biology and medicine. With an included CD-ROM of the full book text allowing the user to do full-text searching of all the papers, the *Review of Radio Science 1999-2002* is a resource of vital importance to anyone working in or with an interest in radio science. L. M. Ericsson review, 2000. *Alcatel Telecommunications Review*, 1996. **Advances in Information Technology** Borworn Papasratorn, Nipon Charoenkitkarn, Vajirasak Vanijja, Vithida Chongsuphajasiddhi, 2013-12-09. This book constitutes the proceedings of the 6th International Conference on Advances in Information Technology (IAIT 2013) held in Bangkok, Thailand, in December 2013. The 23 revised papers presented in this volume were carefully reviewed and selected from numerous submissions. They deal with all areas related to applied information technology. *Internet Technologies and Information Services* Joseph B. Miller, 2014-08-26. The Internet has enabled the convergence of all things information-related. This book provides essential foundational knowledge of the application of Internet and web technologies in the information and library professions. *Internet Technologies and Information Services* Second Edition is a vital asset to students preparing for careers in library and information science and provides expanded coverage to important new developments while still covering Internet foundations. In addition to networking, the Internet, HTML, web design, web programming, XML, and web searching, this new edition covers additional topics such as cloud computing, content management systems, eBook technologies, mobile technologies, and applications, relational database management systems, RDBMS, open source software, and virtual private networking. It also provides information on virtualization and related systems, including desktop virtualization systems. With clear and simple explanations, the book helps students form a solid basic IT knowledge that prepares them for more advanced studies in technology. It supplies an introductory history of the Internet and an examination of current trends with specific emphasis on how online information access affects the LIS fields. Author Joseph B. Miller, MSLS, explains Internet protocols and current broadband connectivity options, Internet security issues and steps to take to block threats, building the web with markup languages, programming, and content management systems, and elements of information access on the web, content formats, information retrieval, and Internet search.
