Laboratory Exercises for Sensory Evaluation Harry T. Lawless, 2012-12-12 Laboratory exercises are a necessary part of science education They enable students to better understand the principles discussed in lectures and provide them with hands on experience of the practical aspects of scientific research The purpose of this book is to provide students and instructors with a time tested set of lab exercises that illustrate the common sensory tests and or sensory principles used in evaluation of foods beverages and consumer products The appendices will also include a set of simple problem sets that can be used to teach and reinforce basic statistical tests Approximately twenty years ago the Sensory Evaluation Division of the

Institute of Food Technologists sponsored the preparation of a set of exercises titled Guidelines for Laboratory Exercises for a Course in Sensory Evaluation of Foods edited by one of the co authors Heymann This book will provide additional materials from the second author Lawless as well as other instructors in a uniform format that can be easily adopted for course use Most importantly the lab exercises will complement the flagship textbook in the field Sensory Evaluation of Foods Principles and Practices 2E also by Lawless and Heymann and published by Springer Possible course adoption of the main text along with the lab manual should enhance the sales of these materials

Making the Most of the Postdoc James

Gould, 2023-09-05 Graduate students and postdoctoral fellows spend upwards of 15 years honing their research skills However in all this training compulsory career and professional development courses are far and few between In the absence of a formal training curriculum this co curricular postdoc guidebook can be used as a manual for aspiring scientists to find career success Postdocs face many hurdles in their pursuit of research excellence and independence None more frustrating than making the most of this challenging yet rewarding opportunity Ultimately the point of postdoc training is not maintaining a lengthy postdoc tenure but landing a satisfying job Regardless of what they do in their career postdocs need to gain and master many skills both directly related to their scientific training and beyond This book posits that if trainees are motivated and given some practical guidance they can build a professional reputation while achieving a successful postdoc experience Based on the personal experiences of the author this book logically outlines the flow of the postdoc experience from beginning to end by providing actionable advice on how to get the most out of postdoctoral training while laying out strategies for choosing the right research environment to thrive along with planning and executing a successful postdoc tenure Written for current and future postdocs as well as their mentors this book covers what they need know and do to strategically advance in their early research career Key Features Practical and actionable advice from an author that has experienced PhD and postdoc training and is now directing a postdoc office at a world renowned research institution Methodical approach most readers can readily adapt for their own purposes Specifically written for current and future STEM postdocs while being agnostic of the research field Dr James Gould PhD is Director of the HMS HSDM Office for Postdoctoral Fellows at Harvard Medical School HMS where he has implemented research career and professional development programs and policies for HMS affiliated trainees since 2011 Prior to HMS Dr Gould completed two postdoc fellowships at the National Cancer Institute of the NIH where he became involved in training affairs and studied cancer metabolism Dr Gould received his BS in Biotechnology Molecular Biology from Clarion University of Pennsylvania and his PhD in Biochemistry and Molecular Biology from the University of Louisville
