Understanding Mathematics: The standards define what students should understand and be able to do in their study of mathematics. Asking a student to understand something means asking a teacher to assess whether the student has understood it.¹ Mathematical understanding and procedural skill are equally important.²

Description of the Pacing Guide: A pacing guide is an interval-based description of what teachers teach in a particular grade or course; the order in which it is taught, and the amount of time dedicated to teaching the content.

Purpose of a Pacing Guide: The purpose of a pacing guide is to ensure that all of the standards are addressed during the academic year. Each pacing guide is nine weeks in duration.

Components of the Pacing Guide:

- **Critical Areas-** Each grade level has identified Critical Areas. These areas are woven throughout the standards and should receive additional time and attention.
- **Mathematical Practice Standards (8)-** Based on the NCTM Process Standards, these standards describe the variety of "processes and proficiencies" students should master while working with the Grade Level Content Standards.
- **Domains are larger groups of related Content Standards.** Standards from different domains may sometimes be closely related.³
- **Clusters are groups of related standards.** Note that standards from different clusters may sometimes be closely related, because mathematics is a connected subject.⁴
- **Grade level standards define what students should know and be able to do by the end of each grade level.**
- **Unpacked standards provide a clear picture for the teacher as he/she implements the CCSS.**
- **Resources—**includes but not limited to current district core resources.

Teaching to the Math Common Core State Standards F. D. Rivera, 2014-02-05 This is a methods book for elementary majors and preservice beginning elementary teachers It takes a very practical approach to learning to teach elementary school mathematics in an emerging Age of the Common Core State Standards The Common Core State Standards in Mathematics CCSSM is not meant to be the official mathematics curriculum it was purposefully developed primarily to provide clear learning expectations of mathematics content that are appropriate at every grade level and to help prepare all students to be ready for college and the workplace A quick glance at the Table of Contents in this book indicates a serious engagement with the recommended mathematics underlying the kindergarten through grade 5 portions of the CCSSM first with issues in content practice assessment learning teaching and classroom management pursued next and in that order In this book we explore what it means to teach to the CCSSM within an alignment mindset involving content practice learning teaching and assessment The CCSSM content standards which pertain to mathematical knowledge skills and applications have been carefully crafted so that they are teachable learnable coherent fewer clearer and higher The practice standards which refer to institutionally valued mathematical actions processes and habits have been conceptualized in ways that will hopefully encourage all elementary students to engage with the content standards more deeply than merely acquiring mathematical knowledge by rote and imitation Thus in the CCSSM proficiency in content alone is not sufficient and so does practice without content which is limited Content and practice are both equally important and thus must come together in teaching learning and assessment in order to support authentic mathematical understanding This blended multisourced text is a getting smart book It helps elementary majors and preservice beginning elementary teachers work within the realities of accountable pedagogy and develop a proactive disposition that is capable of supporting all elementary students in order for them to experience growth in mathematical understanding necessary for middle school and beyond including future careers
