Based on the bestselling *Guided Math in Action*, this practical book offers 16 lessons taught in a round of 3 concrete, pictorial, and abstract. The lessons are based on the priority standards and cover fluency, word problems, fractions, and place value. With the easy-to-follow plans in this book, students can work more effectively in small guided math groups and have loads of fun along the way. Remember that guided math groups are about doing the math. So throughout these lessons, you will see students working with manipulatives to make meaning, doing mathematical sketches to show what they understand, and can make sense of the abstract numbers.
