Lost Knowledge David W. DeLong, 2004-09-09

Executives today recognize that their firms face a wave of retirements over the next decade as the baby boomers hit retirement age

At the other end of the talent pipeline the younger workforce is developing a different set of values and expectations which creates new recruiting and employee retention issues

The evolution from an older traditional highly experienced workforce to a younger more mobile employee base poses significant challenges particularly when considered in the context of the long term orientation towards downsizing and cost cutting

This is a solution oriented book to address one of the most pressing management problems of the coming years

How do organizations transfer the critical expertise and experience of their employees before that knowledge walks out the door

It begins by outlining the broad issues and providing tools for developing a knowledge retention strategy and function

It then goes on to outline best practices for retaining knowledge including knowledge

transfer practices using technology to enable knowledge retention retaining older workers and retirees and outsourcing lost capabilities
